Sommario/riassunto	The World Health Organization's Stop TB Department has prepared this fourth edition of Treatment of Tuberculosis: Guidelines, adhering fully to the new WHO process for evidence-based guidelines. Several important recommendations are being promoted in this new edition. First, the recommendation to discontinue the regimen based on just 2 months of rifampicin (2HRZE/6HE) and change to the regimen based on a full 6 months of rifampicin (2HRZE/4HR) will reduce the number of relapses and failures. This will alleviate patient suffering resulting from

a second episode of tuberculosis (TB) and conserve
