

1. Record Nr.	UNISA996320722203316
Autore	Goffman Casper <1913->
Titolo	Homeomorphisms in analysis // Casper Goffman, Togo Nishiura, Daniel Waterman
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [1997] ©1997
Descrizione fisica	1 online resource (235 p.)
Collana	Mathematical surveys and monographs, , 0076-5376 ; ; volume 54
Disciplina	515/.13
Soggetti	Homeomorphisms Mathematical analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages207 -211) and index.
Nota di contenuto	<p>""Contents""; ""Preface""; ""The one dimensional case""; ""Mappings and measures on $R[\sup(n)]$""; ""Fourier series""; ""Part 1. The One Dimensional Case""; ""Chapter 1. Subsets of R""; ""1.1. Equivalence classes""; ""1.2. Lebesgue equivalence of sets""; ""1.3. Density topology""; ""1.4. The Zahorski classes""; ""Chapter 2. Baire Class 1""; ""2.1. Characterization""; ""2.2. Absolutely measurable functions""; ""2.3. Example""; ""Chapter 3. Differentiability Classes""; ""3.1. Continuous functions of bounded variation""; ""3.2. Continuously differentiable functions""</p> <p>""3.3. The class $C[\sup(n)][0,1]$""""3.4. Remarks""; ""Chapter 4. The Derivative Function""; ""4.1. Properties of derivatives""; ""4.2. Characterization of the derivative""; ""4.3. Proof of Maximoff's theorem""; ""4.4. Approximate derivatives""; ""4.5. Remarks""; ""Part 2. Mappings and Measures on $R[\sup(n)]$""; ""Chapter 5. Bi-Lipschitzian Homeomorphisms""; ""5.1. Lebesgue measurability""; ""5.2. Length of nonparametric curves""; ""5.3. Nonparametric area""; ""5.4. Invariance under self-homeomorphisms""; ""5.5. Invariance of approximately continuous functions""; ""5.6. Remarks""</p> <p>""Chapter 6. Approximation by Homeomorphisms""""6.1. Background""; ""6.2. Approximations by homeomorphisms of one-to-one maps""; ""6.3. Extensions of homeomorphisms""; ""6.4. Measurable one-to-one maps""; ""Chapter 7. Measures on $R[\sup(n)]$""; ""7.1. Preliminaries"";</p>

""7.2. The one variable case""; ""7.3. Constructions of deformations"";
""7.4. Deformation theorem""; ""7.5. Remarks""; ""Chapter 8. Blumberg's
Theorem""; ""8.1. Blumberg's theorem for metric spaces""; ""8.2. Non-
Blumberg Baire spaces""; ""8.3. Homeomorphism analogues""; ""Part 3.
Fourier Series""
""Chapter 9. Improving the Behavior of Fourier Series""""9.1.
Preliminaries""; ""9.2. Uniform convergence""; ""9.3. Conjugate
functions and the PAjl-Bohr theorem""; ""9.4. Absolute convergence"";
""Chapter 10. Preservation of Convergence of Fourier Series""; ""10.1.
Tests for pointwise and uniform convergence""; ""10.2. Fourier series of
regulated functions""; ""10.3. Uniform convergence of Fourier series"";
""Chapter 11. Fourier Series of Integrable Functions""; ""11.1.
Absolutely measurable functions""; ""11.2. Convergence of Fourier
series after change of variable""
""11.3. Functions of generalized bounded variation""""11.4.
Preservation of the order of magnitude of Fourier coefficients"";
""Appendix A. Supplementary Material""; ""Sets, Functions and
Measures""; ""A.1. Baire, Borel and Lebesgue""; ""A.2. Lipschitzian
functions""; ""A.3. Bounded variation""; ""Approximate Continuity""; ""A.
4. Density topology""; ""A.5. Approximately continuous maps into
metric spaces""; ""Hausdorff Measure and Packing""; ""A.6. Hausdorff
dimension""; ""A.7. Hausdorff packing""; ""Nonparametric Length and
Area""; ""A.8. Nonparametric length""; ""A.9. Schwarz's example""
""A.10. Lebesgue's lower semicontinuous area""
