

1. Record Nr.	UNISA996321032803316
Titolo	Journal of clinical and translational science
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , [2017]-
ISSN	2059-8661
Descrizione fisica	1 online resource
Disciplina	616
Soggetti	Medicine, Experimental Human experimentation in medicine Clinical medicine - Research Periodical Fulltext Internet Resources. Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Nota di contenuto	Welcome to your Journal of Clinical and Translational Science -- Certification of clinical and translational researchers: An ill-conceived notion -- Enhancing Clinical Research Professionals' Training and Qualifications (ECRPTQ): Recommendations for Good Clinical Practice (GCP) training for investigators and study coordinators -- Education and training of clinical and translational study investigators and research coordinators: A competency-based approach -- Best practices in social and behavioral research: report from the Enhancing Clinical Research Professional's Training and Qualifications project -- A consult service to support and promote community-based research: Tracking and evaluating a community-based research consult service -- Mapping the evolving definitions of translational research -- Understanding investigators' attitudes through a results-based accountability framework within a single CTSA institution -- From community engagement, to community-engaged research, to broadly engaged team science -- Interdisciplinary dissemination and implementation research to advance translational science: Challenges and opportunities -- The continued evolution of team science --

Patient-Centered Network of Learning Health Systems: Developing a resource for clinical translational research -- Uncertainty quantification in breast cancer risk prediction models using self-reported family health history -- Feasibility of common bibliometrics in evaluating translational science.
