

1. Record Nr.	UNISA996321058303316
Titolo	EURASIP journal on information security
Pubbl/distr/stampa	[Cairo, Egypt] : , : Hindawi Pub. Corp Heidelberg : , : Springer Open
ISSN	2510-523X
Descrizione fisica	1 online resource
Disciplina	[E]
Soggetti	Computer security Computer networks - Security measures Réseaux d'ordinateurs - Sécurité - Measures Sécurité informatique serials (publications) periodicals. Periodicals Serial publications. Periodicals. Publications en série Périodiques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Sommario/riassunto	"The overall goal of the EURASIP Journal on Information Security, sponsored by the European Association for Signal Processing (EURASIP), is to bring together researchers and practitioners dealing with the general field of information security, with a particular emphasis on the use of signal processing tools to enable the security of digital contents. As such, it addresses any work whereby security primitives and multimedia signal processing are used together to ensure the secure access to the data. Enabling technologies include watermarking, data hiding, steganography and steganalysis, joint signal processing and encryption, perceptual hashing, identification, biometrics, fingerprinting, and digital forensics." -- Publisher's website.
