Sommario/riassunto	This book presents the major therapeutic applications of modified rice bran arabinoxylan compound (RBAC) in cancer as well as other chronic

inflammatory diseases. Written by active researchers and clinicians in the field of RBAC, the chapters cover the basic science that defines the unique function of RBAC as well as the clinical evidence derived through human studies. Particular focus is on recent findings from research over the past decades. This book is both practical and evidence based. It will be a core resource for researchers, students, and practitioners of nutrition and natural medicine, as well as be of value to all healthcare professionals with interest in integrative medicine. .
