Pubbl/distr/stampa	Washington, District of Columbia : , : Brookings Institution Press, , 2015 ©2015
ISBN	0-8157-2656-2
Descrizione fisica	1 online resource (160 p.)
Disciplina	333.9100962
Soggetti	Water rights - Nile River Watershed Watershed management - Law and legislation - Nile River Watershed Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The political economy of transboundary water resource management in Africa -- Physical description of the watercourse and basin states -- Setting the stage for conflict in the Nile River basin -- The Nile Waters Agreement : a critical analysis -- Theories of treaty succession and modern Nile governance -- International water law and the Nile River basin -- The Nile Basin Initiative -- The Cooperative Framework Agreement : a new legal regime for the Nile River? -- Egypt, Ethiopia, and the Nile River -- The Grand Ethiopian Renaissance Dam -- Governing the Nile River basin : a way forward.
Sommario/riassunto	The effective and efficient management of water is a major problem, not just for economic growth and development in the Nile River basin, but also for the peaceful coexistence of the millions of people who live in the region. Of critical importance to the people of this part of Africa is the reasonable, equitable and sustainable management of the waters of the Nile River and its tributaries. Written by scholars trained in economics and law, and with significant experience in African political economy, this book explores new ways to deal with conflict over the allocation of the waters of the Nile River and its tributaries. The monograph provides policymakers in the Nile River riparian states and other stakeholders with practical and effective policy options for

dealing with what has become a very contentious problem the effective management of the waters of the Nile River. The analysis is quite rigorous but also extremely accessible.

Nota di contenuto	Introduction -- Between the Theoretical and the Hypothetical -- Taxonomic Uncertainties -- A Biosphere in Flux -- As Far as the Microscope Reveals -- Human Contradictions -- Varieties of Social Contracts -- Biological Consensus Mechanisms: The Future of Co-Existence.
Sommario/riassunto	This book is a provocative and invigorating real-time exploration of the future of human evolution by two of the world's leading interdisciplinary ecologists – Michael Charles Tobias and Jane Gray Morrison. Steeped in a rich multitude of the sciences and humanities, the book enshrines an elegant narrative that is highly empathetic,

personal, scientifically wide-ranging and original. It focuses on the geo-positioning of the human Self and its corresponding species. The book's overarching viewpoints and poignant through-story examine and powerfully challenge concepts associated historically with assertions of human superiority over all other life forms. Ultimately, *The Hypothetical Species: Variables of Human Evolution* is a deeply considered treatise on the ecological and psychological state of humanity and her options – both within, and outside the rubrics of evolutionary research – for survival. This important work is beautifully presented with nearly 200 diverse illustrations, and is introduced with a foreword by famed paleobiologist, Dr. Melanie DeVore.
