1. Record Nr. UNINA9910830910403321

Autore	Suresh A
Titolo	Resource Management in Advanced Wireless Networks
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2023 ©2023
ISBN	1-119-82760-4 1-119-82759-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (337 pages)
Altri autori (Persone)	RamkumarJ BaskarM BashirAli Kashif
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface -- Chapter 1 Introduction to Next Generation Networks 5G and Beyond -- 1.1 Introduction -- 1.1.1 Benefits of 5G Networks -- 1.2 5G Evolution -- 1.2.1 1G-Analog Cellular Networks -- 1.2.2 2G - Digital Mobile Networks -- 1.2.3 3G-High-Speed Data Networks -- 1.2.4 4G Expansion of Mobile Broadband -- 1.2.5 5G-Design Innovation -- 1.3 5G - Exclusiveness -- 1.4 Challenges of Networks -- 1.5 What Will 5G Accomplish? -- 1.6 Progressing Societies -- 1.7 Transforming Industries -- 1.8 The Invention of 5G -- 1.8.1 Technologies of 5G -- 1.8.2 Misinterpretations of 3GPP -Addressed -- 1.8.3 3GPP'S Real-Time Progress Indicator -- 1.9 Role of 5G -- 1.9.1 Impact on an Individual -- 1.9.2 Impact on Industries -- 1.10 Is a New Phone Required for 5G? -- 1.11 Summary -- Bibliography -- Chapter 2 Architecture and Future Trends on Next Generation Networks -- 2.1 Introduction -- 2.2 Topology Characterisitics -- 2.2.1 Network Structure -- 2.2.2 Modeling Network Layers -- 2.2.3 Research Topology Challenges -- 2.3 Current Network Topologies -- 2.3.1 Bus Topology -- 2.3.2 Ring Topology -- 2.3.3 Star Topology -- 2.3.4 Mesh Topology -- 2.4 Trends of Modern Networks -- 2.4.1 Network Link and Collabration -- 2.4.2 Disruptive Technologies -- 2.5 Architecture of Next Generation Networks -- 2.5.1

Functionality of NGN Network -- 2.5.2 Transport Control and Management -- 2.5.3 Service Control Management -- 2.6 Challenges in Network Structure -- 2.6.1 Implementing Dynamic Topologies -- 2.6.2 Management Questions -- 2.6.3 Consideration of Traffic Control -- 2.6.4 Cost Management System -- 2.6.5 Web Service Management -- 2.7 Network Analysis and Routing Protocols -- 2.7.1 Destination Sequenced Distance Vector Protocol -- 2.7.2 Dynamic Source Routing -- 2.7.3 AdHoc on Demand Distance Vector Routing.
2.8 Evolution of Networks and Services Towards NGN -- 2.8.1 Significant Stages in Network and Services -- 2.8.2 Network Convergence and Development -- 2.8.3 IP Base Network Management System -- 2.8.4 Service Extension and Network Integration -- 2.9 Advanced Network and Service Management Technologies -- 2.9.1 Technology of Artificial Intelligence -- 2.9.2 Smart Agent Technology -- 2.10 Conclusion -- References -- Chapter 3 Evolution of Next Generation Networks and Its Contribution Towards Industry 5.0 -- 3.1 Introduction -- 3.2 Networks of 4G -- 3.3 5G and its Vision -- 3.3.1 Requirements for 5G -- 3.3.2 Network Architecture -- 3.3.3 Economic Contributions and Networks Intelligent Automation of 5G -- 3.3.3.1 Internet of Things (IoT): Artificial Intelligent Plus 5Generation is a Smart IoT -- 3.3.3.2 Autonomous Vehicles, Smart Cars -- 3.3.3.3 Manufacturing Sector and Smart Factory -- 3.3.3.4 Healthcare Industry -- 3.3.3.5 Smart Grids and Cities -- 3.4 A Vision and a Need for 6G Communications -- 3.4.1 Development Projects -- 3.4.2 System Architecture of 6G -- 3.4.3 Satellite Network of 6G -- 3.5 Emerging of 7G -- Findings -- 3.6 Conclusions -- References -- Chapter 4 Understanding the Salient Features Related To Resource Management in Broadband Wireless Networks -- 4.1 Introduction -- 4.1.1 Network Topology Related to Wireless Networks -- 4.1.2 Challenges in Wireless Broadband Network -- 4.1.3 Radio Channel -- 4.1.4 Scarcity in the Spectrum Utilization -- 4.1.5 Quality of Service (QoS) -- 4.1.6 OFDM with WiMAX Technology -- 4.1.7 Advanced Modulation and Coding Techniques in WiMAX -- 4.1.8 Conclusion -- References -- Chapter 5 Network Routing and Its Real-Time Practice in Broadband Wireless Networks -- 5.1 Introduction -- 5.2 Outline of Broadband Wireless Networking -- 5.2.1 Type of Broadband Wireless Networks -- 5.2.1.1 Fixed Networks -- 5.2.1.2 WiMAX.
5.2.1.3 The Broadband Mobile Wireless Networks -- 5.2.2 BWN Network Structure -- 5.2.3 Wireless Broadband Applications -- 5.2.3.1 Digital Telephone -- 5.2.3.2 Broadband Data Connections -- 5.2.3.3 Digital Television -- 5.2.4 Promising Approaches Beyond BWN -- 5.3 Routing Mechanisms -- 5.3.1 Distance Vector (DV) -- 5.3.2 Link State (LS) -- 5.4 Security Issues and Mechanisms in BWN -- 5.4.1 DoS Attack -- 5.4.2 Distributed Flooding DoS -- 5.4.3 Rogue and Selfish Backbone Devices -- 5.4.4 Authorization Flooding on Backbone Devices -- 5.4.5 Node Deprivation Attack -- 5.5 Conclusion -- References -- Chapter 6 Routing Mechanism in Broadband Wireless Network -- 6.1 Classification of BWN Routing Protocols -- 6.1.1 Routing -- 6.1.2 Routing-Protocols -- 6.1.2.1 Types of Routing Protocols for Broadband Wireless Network -- 6.2 Routing Mechanism in WiMAX Mesh Network -- 6.2.1 Routing Protocols - IEEE 802.16 Mesh Network -- 6.2.2 Architecture of WiMAX Protocol -- 6.3 Routing Mechanism in Mobile Networks -- 6.3.1 4G Mobile Network -- 6.3.2 5G Mobile Network -- 6.3.3 Convergence Communication Issue -- 6.3.4 Multi-Hop Dynamic Routing Issue -- 6.4 Service Specific Routing Protocols -- 6.4.1 Protocols Based on Topology and Position -- 6.4.2 Protocols Based on Proactive and Reactive Nature -- 6.4.3 Protocols Based on Distance Vector and Link State Routing -- 6.4.4 Protocols Based on Hop-by-Hop

Routing and Source Routing -- 6.4.5 Protocols Based on Flat and Hierarchical Infrastructure -- 6.4.6 Protocols Based on Single-Path and Multipath -- 6.5 Novel Approaches and Algorithms on Broadband Routing -- 6.5.1 Approaches for efficient Performance in Broadband Routing -- 6.5.2 Algorithms for Broadband Routing -- 6.6 Conclusion -- References -- Chapter 7 Interference Problem in 5G with Radio Access Network -- 7.1 Introduction -- 7.1.1 Interface Management. 7.1.2 Management of Conflict in Agile RM Framework -- 7.1.2.1 A Holistic View of Technology -- 7.1.3 Ratings and Context Information -- 7.1.4 Dynamic Traffic Steering -- 7.1.4.1 Reduced-Overhead Interference Mitigation -- 7.1.5 Reducing Overhead Interference Mitigation -- 7.1.5.1 RIM and 5G NR -- 7.1.5.2 Contributions and Differences -- 7.1.6 High-Level 5NR - RIM Framework -- 7.1.7 OS RIM-RS -- 7.1.7.1 OS RIM-RS -- 7.1.8 Radio-Access Network -- 7.1.9 Improve RAN Coverage -- 7.1.9.1 Improving RAN Coverage Can Take Many Forms -- 7.1.10 Related Work -- 7.1.11 Conclusion -- References -- Chapter 8 Interference Techniques Based on Deep Learning in Wireless Networks -- 8.1 Introduction -- 8.2 Literature Review -- 8.3 Suppression Techniques -- 8.3.1 Deep Learning Based Approach -- 8.3.2 Adjacent Channel Interference (ACI) -- 8.3.3 Co-Channel Interference -- 8.3.4 Self-Interference -- 8.3.5 Homogeneous Technology Interference -- 8.3.6 Heterogeneous Technology Interference -- 8.4 Classification of Interference Suppression Techniques -- 8.5 A Blind Approach of Interference Cancellation Using Neural Networks -- 8.6 Interference Estimation -- 8.6.1 Feature Extraction -- 8.6.2 Channel Usage Ratio -- 8.7 Machine Learning Model-Decision Tree -- 8.8 Lookup Table -- 8.9 Conclusion -- References -- Chapter 9 Implementing SDN Process-Based MRMC Wireless Networks -- 9.1 Multi-Radio Multi Channel Network in Wireless Network -- 9.1.1 The Concept of QoS inWN -- 9.2 QoS Challenges in MRMC Based Wireless Networks -- 9.2.1 Bandwidth Limitation -- 9.2.2 Removal of Redundancy -- 9.2.3 Energy and Delay Trade-Off -- 9.2.4 Buffer Size Limitation -- 9.3 Opportunistic Routing -- 9.4 The Need for Software-Defined Network in WSN for Enhancing QoS -- 9.4.1 QoS Management -- 9.5 ILP Problem Design -- 9.5.1 Network Model -- 9.5.2 Interference Model -- 9.5.3 VL Request Design.
9.6 Problem Constraints -- 9.6.1 Genetic Algorithm -- 9.6.2 Balanced Source Distribution with DL Cost -- 9.7 Virtual Network Embedding -- 9.7.1 Specification of Virtual Network Embedding -- 9.7.2 System Model -- 9.7.3 Open Flow Enabled Network -- 9.7.4 Network Model -- 9.7.5 Interference Model -- 9.8 Algorithm on Interference Modeling and Channel Selection Process -- 9.8.1 Interference Aware Routing Algorithm -- 9.8.2 Channel Assignment Algorithm -- 9.8.3 The MCM Algorithm -- 9.9 Performance Evaluation -- 9.9.1 Network Model -- 9.9.2 Load Design Algorithm -- 9.9.3 Simulation Settings -- 9.9.4 Performance Metrics -- 9.10 Performance Results -- 9.10.1 Handling with WL Intervention -- 9.10.2 Evaluating the Multicast Gain -- 9.10.3 Clique Utilization Balancing -- 9.10.4 Analysis of Switch Resource Consumption -- 9.10.5 Embedding Method Selection: Integer Linear Programming Vs Genetic Algorithm -- 9.11 Conclusion -- References -- Chapter 10 Advanced Wireless Mobile Network on Financial Literacy -- 10.1 Introduction -- 10.2 Statement of the Problem -- 10.3 Objectives of the Study -- 10.4 Hypothesis -- 10.5 Sampling Design -- 10.6 Literature Review -- 10.7 Methodology -- 10.8 Measurement of Financial Literacy -- 10.9 Elements of Financial Literacy -- 10.10 Financial Literacy Among Scheduled Community -- 10.11 Age Wise Status of Financial Literacy -- 10.12 Financial Literacy Among

		Scheduled Communities of Different Age Group - ANOVA -- 10.12.1 Null Hypothesis -- 10.13 Financial Literacy and its Relationship with Gender -- 10.13.1 Null Hypothesis -- 10.14 Financial Literacy and its Relationship with Marital Status -- 10.14.1 Null Hypothesis -- 10.15 Financial Literacy and its Relationship with Religion -- 10.15.1 Null Hypothesis -- 10.16 Financial Literacy Among Scheduled Communities of Different Educational Qualification - ANOVA -- 10.16.1 Null Hypothesis. 10.17 Occupation Wise Status of Financial Literacy.

	Autore	Caiani Manuela
	Titolo	Web nero : Organizzazioni di estrema destra e Internet / / Manuela Caiani, Linda Parenti
	Pubbl/distr/stampa	Bologna : , : Societa editrice il Mulino, Spa, , 2013
	ISBN	88-15-31426-1
	Descrizione fisica	1 online resource (256 pages)
	Collana	Studi e ricerche (il Mulino)
	Disciplina	02.231
	Soggetti	Internet - Political aspects
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Prefazione -- Capitolo primo Organizzazioni di estrema destra e internet -- Capitolo secondo Opportunita «tecnologiche», politiche e culturali per l'estrema destra in Europa e negli Stati Uniti -- Capitolo terzo La struttura organizzativa della galassia (online) dell'estrema destra -- Capitolo quarto Gruppi di estrema destra e internet: costruzione di identita e fonte di mobilitazione -- Capitolo quinto Tra reale e virtuale: strategie di azione dell'estrema destra oltre la rete -- Capitolo sesto Sfide e opportunita di internet per l'estrema destra -- Appendice -- Abbreviazioni -- Riferimenti bibliografici.
	Sommario/riassunto	In tutto il mondo l'uso di Internet da parte dei gruppi estremisti e in crescita, ma si sa ancora poco di come essi utilizzino la Rete per la loro attivita politica e sociale: fare proseliti, diffondere la propria causa, costruire la propria identita, mobilitare aderenti e potenziali simpatizzanti. Sulla base di una dettagliata analisi di oltre 500

organizzazioni di estrema destra e dei loro siti web in sei paesi occidentali (Italia, Francia, Germania, Inghilterra, Spagna e Stati Uniti), questo volume fornisce, coniugando dati statistici e narrazione illustrativa, una mappa dettagliata della presenza e dell'attivita in Internet di movimenti, partiti e organizzazioni giovanili della destra radicale, fino ai gruppi neofascisti e neonazisti.
