economy prior to the crisis -- Trade in intermediate goods -- Foreign direct investment stocks in manufacturing industries -- Foreword -- Intra-industry trade -- International trade and investment flows -- Trade in environmental goods -- Trade of goods -- Production depth and export share of production -- Inward activity -- Trade in intermediate goods -- Foreign direct investment stocks in service industries -- Inward activity -- Trade of services -- Impact of the crisis on foreign direct investment -- Inward activity -- Foreign scholars in the United States -- S&E doctorates awarded and postdoctoral appointments to foreign citizens in the United States -- Foreign direct investment flows by type of financing -- Multinational enterprises and the crisis -- Global value chains and the crisis -- The changing geography of environmental innovation -- Source and destination of foreign direct investment stocks -- Transfer of environmental technologies -- Foreign direct investment stocks -- Outward activity -- Synchronisation of collapse in international trade -- Internationalisation of higher education -- Intra-regional trade -- Global economic crisis: GDP growth -- Impact of the crisis on international trade -- Inward activity: importance of foreign affiliates in host countries' R&D -- Sensitivity of trade flows to price and income changes -- General foreign direct investment trends -- Global economic crisis: stock market trends -- Inward activity -- Impact of the crisis on mergers and acquisitions -- Inward activity -- International mobility of doctoral students -- Inward activity -- Intra-firm trade and impact on the trade balance -- Technology balance of payments -- Geographical distribution of shares of export of goods (cont.) -- Intra-firm trade and impact on the trade balance -- Inward investments in R&D -- Trade in knowledge-intensive goods -- Technology balance of payments and domestic R&D activity -- Geographical distribution of shares of exports in services -- Import penetration of goods and services -- International co-operation in S&T -- Triadic patent families -- Export and import propensity of foreign affiliates -- R&D investments and multinationals -- World export market shares -- International co-operation in science -- Geographical distribution of shares of exports of goods -- World export market shares (cont.) -- Intra-firm trade in selected OECD countries.

Sommario/riassunto

This second edition of the OECD Economic Globalisation Indicators presents a broad range of indicators showing the magnitude and intensity of globalisation. This process is becoming increasingly important for policymakers and other analysts, hence the need for a volume that brings together the existing measures, based on national data sources and comparable across countries. Together, the indicators shed new light on financial, technological and trade interdependencies within OECD and non-OECD countries. Measures of globalisation include indicators on capital movements and foreign direct investments, international trade, the economic activity of multinational firms and the internationalisation of technology. In addition, the 2010 edition also includes indicators linked to the current financial crisis, portfolio investments, environmental aspects and the emergence of global value chains.
