Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; Editors and Contributors; Section I: Prevention and diagnosis; Section II: Regional prostate cancer - localized and locally advanced cancer; Section III: Advanced prostate cancer - distant metastases; Section IV: Management of complications; Abbreviations; Index
Sommario/riassunto	Prostate cancer accounts for nearly a quarter of all male cancers, and the incidence is rising as detection rates continue to improve, and life expectancy increases. Timely intervention affords a wider range of

management options and in this new volume the editors review the choices available. In the first section lifestyle interventions, such as nutrition and screening, and evaluation of risk factors are discussed; then follows an update on management strategies for localised and locally advanced cancer in various risk groups, drawing on the results of the latest clinical trials. The third se
