

1. Record Nr.	UNISA996339091403316
Autore	Kristensen S. D. <1955->
Titolo	Therapeutic Strategies in Thrombosis [[electronic resource]]
Pubbl/distr/stampa	Oxford, : Atlas Medical Publishing Ltd, 2005
ISBN	1-280-30995-4 9786610309955 1-84692-543-6
Descrizione fisica	1 online resource (405 p.)
Collana	Therapeutic Strategies
Altri autori (Persone)	De CaterinaR. <1954-> MoliternoDavid J
Disciplina	616.13506
Soggetti	Thrombolytic therapy Thrombosis -- Treatment Thrombosis Cardiovascular Diseases Medicine Health & Biological Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; Contributors; 1. Arterial thrombosis: a brief overview; 2. Aspirin: a risk-based strategy; 3. Clopidogrel and other platelet ADP inhibitors; 4. Glycoprotein IIb/IIIa inhibitors; 5. Unfractionated heparin and low-molecular-weight heparin in coronary heart disease; 6. Intravenous direct thrombin inhibition: acute coronary syndromes and heparin-induced thrombocytopenia; 7. Direct thrombin inhibition during percutaneous coronary interventions; 8. Pentasaccharide and other factor Xa inhibitors 9. Direct thrombin inhibition - thromboprophylaxis, deep venous thrombosis, atrial fibrillation and coronary artery disease 10. Warfarin after acute myocardial infarction; 11. Thrombolytic therapy and concomitant antithrombotic therapy; 12. Pre-hospital reperfusion therapy; 13. Antithrombotic strategies in patients undergoing primary percutaneous intervention; 14. Antithrombotic management in patients with prosthetic valves; 15. Stroke: thrombolysis and antithrombotic

therapy; 16. Atrial fibrillation: antithrombotic therapy; 17, Venous thromboembolism: pathophysiology and diagnosis
18. Antithrombotic therapy in venous thrombosis and pulmonary embolism
19. Prevention and treatment of venous and arterial thrombosis in patients with specific conditions: diabetes, hypercoagulable states, pregnancy and renal diseases; 20. Monitoring of antithrombotic drugs; Index

Sommario/riassunto

In this new volume, leading authorities from around the world provide an evidence-based review of the therapeutic options currently available for the management of thrombosis. Topics covered include the use of aspirin for primary and secondary prophylaxis, platelet inhibitors, glycoprotein IIb and IIIa inhibitors, pentasaccharides, warfarin, and other agents. Other sections discuss the implementation of antithrombotic therapy in managing specific clinical conditions such as pulmonary embolism, atrial fibrillation, stroke and diabetes, or as an adjunct to other procedures such as PCI.
