OECD Framework for Environmental Indicators; References and Bibliography; Conventions and Abbreviations; Members of the Working Group on Environmental Information and Outlooks
Sommario/riassunto	This book includes key environmental indicators endorsed by OECD Environment Ministers and major environmental indicators from the OECD Core Set. These indicators reflect environmental progress made since the early 1990's and thus contribute to measuring environmental performance. Organised by issues such as climate change, air pollution, biodiversity, waste or water resources, they provide essential information for all those interested in the environment and in sustainable development.
