

1. Record Nr.	UNISA996339110003316
Titolo	The Princeton guide to ecology // Simon A. Levin, editor ; Stephen R. Carpenter and others, associate editors
Pubbl/distr/stampa	Princeton, : Princeton University Press, c2009 Princeton : , : Princeton University Press, , 2009
ISBN	1-78268-296-1 1-282-69213-5 9786612692130 1-84972-699-X 1-4008-3302-7
Edizione	[Course Book]
Descrizione fisica	1 online resource (xiii, 809 pages, [16] pages of plates) : illustrations (some color), maps (some color)
Collana	Gale eBooks
Classificazione	RB 10525
Disciplina	577
Soggetti	Ecology Ecology - Economic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based on print version record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Autecology -- Population ecology -- Communities and ecosystems -- Landscapes and the biosphere -- Conservation biology -- Ecosystem services -- Managing the biosphere -- Milestones in ecology.
Sommario/riassunto	The Princeton Guide to Ecology is a concise, authoritative one-volume reference to the field's major subjects and key concepts. Edited by eminent ecologist Simon Levin, with contributions from an international team of leading ecologists, the book contains more than ninety clear, accurate, and up-to-date articles on the most important topics within seven major areas: autecology, population ecology, communities and ecosystems, landscapes and the biosphere, conservation biology, ecosystem services, and biosphere management. Complete with more than 200 illustrations (including sixteen pages in color), a glossary of key terms, a chronology of milestones in the field, suggestions for further reading on each topic, and an index, this is an essential volume for undergraduate and graduate students, research ecologists, scientists in related fields, policymakers, and anyone else with a serious

interest in ecology. Explains key topics in one concise and authoritative volume Features more than ninety articles written by an international team of leading ecologists Contains more than 200 illustrations, including sixteen pages in color Includes glossary, chronology, suggestions for further reading, and index Covers autecology, population ecology, communities and ecosystems, landscapes and the biosphere, conservation biology, ecosystem services, and biosphere management
