Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Overview of the treatment of the critically ill patient -- Respiratory emergencies -- Cardiac emergencies -- Cardiovascular emergencies -- Shock -- Neurological emergencies -- Acute renal failure -- G.I. emergencies -- Endocrine emergencies -- Poisoning -- Critical care outreach -- Ethical & legal issues.
Sommario/riassunto	Nursing Medical Emergency Patients is a practical guide to the nursing care and management of patients with medical emergencies involving system failure. Following an initial chapter on assessment, the authors adopt a system-by-system approach, with an emphasis on the clinical features of medical emergencies, their assessment, diagnosis and treatment. Nursing Medical Emergency Patients is a vital resource for all nurses working with medical emergency patients, and provides an essential companion to both Monitoring the Critically Ill Patient and Treating the Critically
