**Sommario/riassunto**

This new volume brings together the current thinking in both investigation and management of the female patient requiring treatment for gynaecological, reproductive and menopausal conditions. It presents a comprehensive caseload as seen by the practicing clinician, presenting common yet challenging real-life patient scenarios, which the authors resolve by drawing on the latest published literature. Each case begins with a few practical questions, followed by clinical presentation and the reader is led through the logical work-up of a case to reach a diagnosis. An algorithm accompanies most cas
