Sommario/riassunto	The evidence base in diabetes is accumulating rapidly. Prevalence of diabetes is increasing globally, and it is increasingly managed by multi-disciplinary teams working across primary and secondary care. Health professionals working in diabetes need to keep up to date with recent developments. There has also been a boom in both the primary and secondary literature of diabetes. Textbooks and monographs abound which summarize the classic characteristics of the "typical" diabetes patient. Meanwhile the doctor treating individuals needs current information to enable him/ her to solve real life and
