Sommario/riassunto	Asthma currently affects more than 150 million people worldwide with almost half of these experiencing symptoms that disrupt their everyday lives. In addition prevalence is rapidly increasing on a global basis,

particularly in young children and adults. Astonishingly 180,000 people still lose their lives to asthma each year. Asthma: An Atlas of Investigation and Management is an illustrated textbook and reference for clinicians. Containing 144 full colour pages, this outstanding new volume provides vital visual information on the diagnosis, symptoms and prevention of asthma. Rich with photography
