of uncertain malignant potential; Chapter 6: Epidemiology of breast cancer; Chapter 7: Histology of breast cancer; Chapter 8: Staging of breast cancer; Chapter 9: Local treatment of early breast cancer; Chapter 10: Systemic treatment of early breast cancer; Chapter 11: Treatment of locally advanced, metastatic and recurrent breast cancer; Chapter 12: Aesthetic aspects of the treatment of breast cancer; Chapter 13: Complications of the treatment of breast cancer; Index

Sommario/riassunto

Meeting the needs of specialist surgeons, oncologists, radiologists, breast physicians and breast-care nurses, this atlas provides a comprehensive visual presentation of breast cancer. Compiled by leading experts in the UK, this book leads the reader through the anatomy of the breast, followed by a clear guide to the use of available imaging and diagnostic techniques, including ultrasound, mammography, histopathology and immunohistochemistry. Pertinent clinical information relating to clinical presentation, differential diagnosis and prognostic indicators are concisely outlined, and the assess
