

1. Record Nr.	UNISA996339119103316
Autore	Fonseca V
Titolo	Therapeutic Strategies for the Metabolic Syndrome [[electronic resource]]
Pubbl/distr/stampa	Oxford, : Atlas Medical Publishing Ltd, 2008
ISBN	9781846952592 1-281-79090-7 9786611790905 1-84692-592-4
Descrizione fisica	1 online resource (170 p.)
Collana	Therapeutic Strategies
Disciplina	616.39
Soggetti	Metabolic syndrome -- Chemotherapy Metabolic syndrome -- Pathophysiology Metabolic syndrome -- Treatment Metabolic Syndrome X Insulin Resistance Metabolic Diseases Hyperinsulinism Nutritional and Metabolic Diseases Diseases Glucose Metabolism Disorders
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; Editor; Contributors; Preface; 1. Lifestyle intervention to reduce metabolic and cardiovascular risks; 2. Dietary controversies in treatment of the metabolic syndrome; 3. An exercise prescription for the metabolic syndrome; 4. Impact of hypoglycemic agents on the metabolic syndrome; 5. Weight loss agents and the metabolic syndrome; 6. Blockage of the renin-angiotensin system in metabolic syndrome: implications for the prevention of diabetes; 7. Lipid management in the metabolic syndrome; 8. A potential role for insulin in management of the metabolic syndrome 9. Suppressing inflammation: a novel approach to treating the

---

Sommario/riassunto

The metabolic syndrome is characterised by the presence in a particular individual of a number of metabolic risk factors that combine to put that patient at an increased risk of coronary artery disease, stroke, and diabetes. In this ground-breaking work, leading authorities in the field explain current thinking on how these risk factors may be managed, singly and in combination, enabling clinicians to formulate treatment plans that achieve better health outcomes for their patients.
