Radvansky -- Diseases where patient behaviors are a key factor: ethical issues / Doris V. Chaplin -- Long-term care patients: ethical issues / Diane Stillman -- Ethical issues in organ transplantation / Carolyn H. McGrory, Linda Wright -- End-of-life ethical issues / JoAnne Reifsnyder ... [et al.] -- Right to die: ethical issues / Sally J. Nunn -- Access to care and ethical issues / Caroline Camunas -- Organizational ethics / Mary Lou Helfrich Jones -- Leadership ethics / Kathy Malloch -- Labor ethics / Vicki D. Lachman, Julia W. Aucoin -- Ethics committees / Barbara B. Ott -- Religion and ethics / Syvil S. Burke -- Culture and ethics / Joyce

Bedoian.

Sommario/riassunto

What constitutes "informed consent"? What can I do if the patient lacks the capacity to make decisions? How should I respond to a patient who requests my help in dying? What is the rationale for giving a patient medication (chemical restraints) against his or her will? What exactly are "patient's rights" and how does one advocate for one's patients? Applied Ethics in Nursing provides an easily understandable guide to the kind of ethical dilemmas you face in practice. Using a question-and-answer format along with numerous case studies, this text offers best practices and strategies for approaching the difficult problems commonly found in clinical practice. This book also addresses organizational and institutional issues that can confound or promote ethically sound decision making. Each chapter ends with a resource list of websites and recommendations for further reading. The American Nurses' Association Code of Ethics for Nurses is used as a guide throughout, along with standards and guidelines from other major healthcare and governmental organizations.
