Sommario/riassunto	Being a home to more than 80 ethnic groups, Ethiopia has to balance normative diversity with efforts to implement state law across its territory. This volume explores the co-existence of state, customary, and religious legal forums from the perspective of legal practitioners and local justice seekers. It shows how the various stakeholders' use of negotiation, and their strategic application of law can lead to unwanted confusion, but also to sustainable conflict resolution, innovative new

procedures and hybrid norms. The book thus generates important knowledge on the conditions necessary for stimulating a cooperative co-existence of different legal systems.

Sommario/riassunto	Heroes and icons. Athletes and entertainers. Trailblazers and game-changers. The world lost many brilliant women and men in 2015, but legacies live on. The Washington Post beautifully and comprehensively encapsulates some of the luminaries the world lost in 2015. Brilliant and beloved, fiery and controversial, these twenty-one lives live on through sheer influence. From legends like B.B. King, whose guitar-playing inspired musicians across all genres, to Julian Bond, whose tireless work on behalf of Civil Rights resonates to this day. From wildly

exciting lives, like Elizabeth McIntosh, the spy who helped defeat the Axis, to more contemplative lives, like that of Oliver Sacks, who revolutionized the way we look at the human brain, the recounting of these twenty-one lives showcase the impact a human being can have on the world.
