

1. Record Nr.	UNISA996359945503316
Titolo	Revista forestal Mesoamericana Kurú
Pubbl/distr/stampa	Cartago : , : Escuela de Ingeniería Forestal, , 2004-
Descrizione fisica	1 online resource
Disciplina	630 333.7
Soggetti	Forests and forestry Forests and forestry - Costa Rica Periodicals. Zeitschrift Costa Rica
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed

2. Record Nr.	UNISALENTO991003079219707536
Autore	Weedman, Daniel W.
Titolo	Quasar astronomy / Daniel W. Weedman
Pubbl/distr/stampa	Cambridge ; New York : Cambridge University Press, c1986
ISBN	0521356741 (pbk.)
Edizione	[1st paperback ed.]
Descrizione fisica	xiii, 217 p. : ill. ; 24 cm.
Collana	Cambridge astrophysics series
Disciplina	52.9.54 523 QB860
Soggetti	Quasars Radio astronomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index. Bibliography: p. [206]-214.

3. Record Nr.	UNINA9910337588803321
Autore	Teske Sven
Titolo	Achieving the Paris Climate Agreement Goals [[electronic resource]] : Global and Regional 100% Renewable Energy Scenarios with Non-energy GHG Pathways for +1.5°C and +2°C // edited by Sven Teske
Pubbl/distr/stampa	Cham, : Springer Nature, 2019 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-05843-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (LIX, 491 p. 210 illus., 182 illus. in color.)
Disciplina	621.042
Soggetti	Renewable energy resources Climate change Sustainable development Natural resources Renewable and Green Energy Climate Change Management and Policy Sustainable Development Natural Resource and Energy Economics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: The scientific status quo of climate change -- Chapter 2: Development of energy markets – past, present and future perspectives -- Chapter 3: 100% renewable energy – the concept -- Chapter 4: Modelling approaches -- Chapter 5: Energy transition – main assumptions (working title) -- Chapter 6: Global Transport – transition concepts -- Chapter 7:Energy Scenario results -- Chapter 8: Non-energy GHG mitigation scenarios -- Chapter 9: Linking Energy Transition and Climate change mitigation -- Chapter 10: Employment projections -- Chapter 11: Requirement of minerals and metals for 100% RE scenarios -- Chapter 12: Discussion, Conclusions and Recommendations.
Sommario/riassunto	This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical

regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.
