| Livello bibliografico | Monografia |
| Note generali | Includes index. |
| Sommario/riassunto | This book constitutes the refereed proceedings of the IFIP WG 13.2/13.5 Joint Working Conferences: 6th International Conference on Human-Centered Software Engineering, HCSE 2016, and 8th International |

Conference on Human Error, Safety, and System Development, HESSD 2016, held in Stockholm, Sweden, in August 2016. The 11 full papers and 14 short papers presented were carefully reviewed and selected from 32 submissions. The papers cover various topics such as integration of software engineering and user-centered design; HCI models and model-driven engineering; incorporating guidelines and principles for designing usable products in the development process; usability engineering; methods for user interface design; patterns in HCI and HCSE; software architectures for user interfaces; user interfaces for special environments; representations for design in the development process; working with iterative and agile process models in HCSE; social and organizational aspects in the software development lifecycle; human-centric software development tools; user profiles and mental models; user requirements and design constraints; and user experience and software design.

Sommario/riassunto

Das Ziel der Studie ist eine Neulektüre von Haroldo de Campos' polyphonem Weltgedicht Galáxias (1984), das bisher vor allem im Kontext der konkreten Poesie und des lateinamerikanischen Neobarock besprochen wurde. Jasmin Wrobel zeigt, dass das Werk vielmehr als poetisches Zeitzeugnis des Jahrhunderts der Katastrophen zu lesen ist: die Referenzen auf traumatische historische Ereignisse – insbesondere auf die Shoah und den europäischen Faschismus – verankern sich als ‹Stolpersteine› in der Textarchitektur der Galáxias, eine Konzept-Metapher, die in der Untersuchung in erster Linie von Gunter Demnigs Mahnmal-Projekt hergeleitet wird. In der Analyse wird erörtert, wie diese ‹textuellen Stolpersteine› zu Momenten des Innehaltens und Verstehens an der hermetischen, neobarocken Textoberfläche führen und wie sie sich zu einer ‹Poetik des Stolperns› fügen. In diesem Zusammenhang wird auch die Bedeutung von Haroldo de Campos' Europareisen 1959 und 1964 aufgezeigt, die sich als interpretatorische Schlüsselrouten für das Werk erweisen. Die Begegnung mit dem US-amerikanischen Dichter Ezra Pound 1959 wird hierbei als eigener ‹Stolperstein› auf de Campos' Weg zu den Galáxias identifiziert.

The polyphonic world poem Galáxias (1984) by Brazilian poet Haroldo de Campos has, to date, mainly been discussed in the broader context of concrete poetry and the Latin American neo-baroque. In this book, Jasmin Wrobel offers a completely new reading of the work as a poetic testimony to a century of catastrophes: references to traumatic historical events are embedded as 'stumbling blocks' in the textual architecture, guiding the reader towards a 'Poetics of Stumbling'.
