Sommario/riassunto	Les contributions rassemblées ici envisagent la question des normes (orthographique, morphologique, syntaxique, rhétorico-textuelle, interactionnelle) dans des corpus aussi variés que la littérature contemporaine, la presse, les interactions orales en situation de classe

ou les nouveaux médias (clips, SMS, tweets). Elles constituent autant de cas pratiques permettant de mesurer à quel point les locuteurs mobilisent sciemment les normes textuelles et discursives, que ce soit pour faire émerger un réglage inédit, déplacer une routine discursive, ou encore hybrider la langue en reposant la question du genre des discours et du rôle social du langage.
