Soggetti	cultural difference national minority sociocultural group social adjustment ethnic group ethnic discrimination gender identity gender equality religion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	<p>NEW DIVERSITIES is an online journal publishing high quality, peer-reviewed articles concerning multiple forms of diversity. It carries on the work of its predecessors DIVERSITIES and The International Journal on Multicultural Societies (IJMS). Diversities and the IJMS published policy relevant social science research on multiculturalism, and established itself as a successful electronic journal with a broad audience worldwide. It continues in this tradition in presenting new research on different kinds of social difference – including ethnicity, religion, language, gender, sexuality, disability, social status and age: how these notions are socially constructed, how they unfold in different contexts and how they are addressed in policy and practice. The journal provides a forum for discussion, debate, refinement of social theory and development of key ideas at the nexus of research and policy. Topics and contributors represent the full range of global regions.</p> <p>Refereed/Peer-reviewed</p>

Livello bibliografico	Monografia
Sommario/riassunto	This book features a collection of high-quality and peer-reviewed papers from the 2023 7th International Conference on Applied Economics and Business, which was held in Copenhagen, Denmark, during August 24-26, 2023. ICAEB is held annually as a platform for the presentation of new advances and research results in the fields of applied economics and business. Applied economics is a way of dealing with esoteric economic concepts in a practical and analytical way. It

allows for decisions to be made that are underlined by theoretical economic principles but utilized in such a way that they transform into real work applications. The contributors cover topics such as environment, development, finance, forensics, information, institutions, international, labor, management, mathematics, currency, tourism and many more. Applied Economics affects all aspects of life and science and it is brought to the forefront in this collection of papers. The conference, with its aim to bring together economists from different fields, lends itself to a natural and rich collection of scientific papers all focused on the practical application of economic principles. The scope of this collection of papers will be useful to academics and practitioners who look to economics to help solve problems.
