Titolo	Advances in Chronic and Neuropathic Pain // edited by Jeimylo de Castro, Yasser El Miedany
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	3-031-10687-3
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (401 pages)
Collana	Contemporary Rheumatology, , 2662-754X
Disciplina	616.0472
Soggetti	Rheumatology Pain medicine Pain Medicine Dolor crònic Malalties del sistema nerviós Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Section 1: Understanding Chronic and neuropathic pain -- Classification of Chronic pain -- The Challenges in Dealing with Chronic and Neuropathic Pains -- Section 2: Pathophysiology -- The Pathophysiology of Chronic Pains -- The Pathophysiology of Neuropathic Pain -- Section 3: Age and Pain -- Pain in Children and Young Adults -- Pain in older adults -- Section 4: Pain processing medical problems -- Cancer and Pain -- Degenerative Diseases and Pain -- Complex Regional Pain Syndromes -- Neuropathic Pain Syndromes -- Fibromyalgia as a Neuropathic Pain Disorder -- Section 5: Clinical Matters -- Clinical Assessment -- Diagnostic testing of neuropathic pain -- Outcome Measures for chronic Pain -- Section 6: Management of chronic and neuropathic pains -- Non-Pharmacologic Modalities to Chronic and Neuropathic Pains -- Pharmacologic Approaches to Chronic and Neuropathic Pains -- Section 7: Interventional Therapy -- Interventional Procedures for Chronic and Neuropathic Pains -- Regenerative Interventions in Chronic and Neuropathic Pains .

This book is an in depth guide to chronic and neuropathic pain. The issue of chronic and neuropathic pain is very prevalent, yet only a fraction of the symptoms and root causes, as well as potential treatment plans, are properly understood. Additionally, less than half of cases are accurately identified and properly treated. The existing drugs, although classified as very strong and powerful, cannot provide lasting relief to chronic and neuropathic pain. Thus, with all the unique features of this condition, this book presents a systematic way of diagnosing and approaching this condition so every practitioner can appropriately treat their patients. In addition to introducing key concepts, like classification of chronic pain and the challenges patients and practitioners face when dealing with and treating chronic and neuropathic pain, this book will also cover different syndromes that can lead to neuropathic pains. It also discusses how to monitor progress by using outcome measures, the presence of chronic and neuropathic pain in children and young adults, and the pathophysiology of neuropathic pain as it relates to the release of pro-inflammatory cytokines. Interestingly, the latter is not presently addressed except with the usual pain drugs for general pain—this book aims to revolutionize the approach to chronic and neuropathic pain by exploring it separately from the clinical approach to general pain. It is interesting to note that these cytokines require a specific mode of action if we want to neutralize them in our system, and this concept will be discussed in the regenerative intervention sections. Since it is so necessary to address the many factors to chronic and neuropathic pain as laid out in the proposed table of contents, it is also critical include as varied authors as possible to address this condition from all areas being covered. The team assembled to author the chapters included in this text come from diverse backgrounds of practice and clinical and research interests, from physical medicine and rehabilitation to anesthesiology to radiology and interventional pain medicine. This is an ideal guide for all clinicians caring for patients with chronic and neuropathic pain.
