Sommario/riassunto

The main aim of this book is to assess the importance of international rules for foreign direct investment and the major challenges to international harmonization of those rules. Particular attention is paid to the most controversial and contentious issues with the view of appraising the prospects for establishing global rules. The book is divided into three parts; the first part includes papers assessing the role of national and international legislation with further distinction being made between bilateral, regional and multilateral legal frameworks. The second part addresses regulatory issues
