Autore	Grebner Paul
Titolo	Europes wonder, or, The Turks overthrow [[electronic resource] ] : contained in a prophecie : treating of those strange mutations yet expected, as the destruction of the Turkish Empire, the ruine of the popish hierarchy, with the conversion of the Jewes, and their restauration to their ancient inheritance in the Holy Land, and of the uuiversal [sic] reign of the Gospel of Christ upon earth : with a great victory lately obtained against the Turks, by His Majesty the King of Great Britain's Royal Navy, under the command of the Right Honourable the Lord G. Montague : the entring of the famous Port of Guienne, the taking of the strong fort of Agria & the coming of the Knights of Malta and Venecians to the assistance of the English fleet, with a brief narrative of their bloody fight, and the chief particulars thereof. // written by that famous divine Paul Grebner
Pubbl/distr/stampa	Hague, : Printed by John Brown, 1661
Descrizione fisica	[2], 5, [1] p. : ill
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Reproduction of original in Huntington Library.
Sommario/riassunto	eebo-0113

2. Record Nr.	UNINA9910566486703321
Autore	Kocich Radim
Titolo	Selected Papers from Experimental Stress Analysis 2020
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (214 p.)
Soggetti	History of engineering & technology Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This Special Issue consists of selected papers from the Experimental Stress Analysis 2020 conference. Experimental Stress Analysis 2020 was organized with the support of the Czech Society for Mechanics, Expert Group of Experimental Mechanics, and was, for this particular year, held online in 19-22 October 2020. The objectives of the conference included identification of current situation, sharing professional experience and knowledge, discussing new theoretical and practical findings, and the establishment and strengthening of relationships between universities, companies, and scientists from the field of experimental mechanics in mechanical and civil engineering. The topics of the conference were focused on experimental research on materials and structures subjected to mechanical, thermal-mechanical, and dynamic loading, including damage, fatigue, and fracture analyses. The selected papers deal with top-level contemporary phenomena, such as modern durable materials, numerical modeling and simulations, and innovative non-destructive materials' testing.</p>
