

1. Record Nr.	UNISA996385943003316
Titolo	An ordinance of the Lords and Commons assembled in Parliament [[electronic resource] ] : concerning the election of Common-council men, and other officers in the City of London. Die Mercurii 20. Decemb. 1648
Pubbl/distr/stampa	[London], : Printed by Richard Cotes, [1648]
Descrizione fisica	1 sheet ([1] p.)
Altri autori (Persone)	ReynardsonAbraham, Sir, <1590-1661.>
Soggetti	Great Britain History Civil War, 1642-1649 Early works to 1800 London (England) History 17th century Early works to 1800 London (England) Politics and government 17th century Early works to 1800
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Place of publication and imprint date from Wing. Besides the ordinance of 18 December, it is also ordered that no person who took the engagement for a personal treaty is to be elected to any office -- Cf. Steele. Includes an order from the mayor (also dated 20 December 1648) requiring the publishing of this ordinance, together with the one dated December 18 'of this instant moneth at your elections' (Wing (2nd. ed. 1994) E1955). Ordinance of 18 December signed: Jo. Brown Cleric. Parliamentorum. Reproduction of the original in the British Library.
Sommario/riassunto	eebo-0018

2. Record Nr.	UNINA9910971034803321
Titolo	Ground water at Yucca Mountain : how high can it rise? : final report of the Panel on Coupled Hydrologic/Tectonic/Hydrothermal Systems at Yucca Mountain / / Panel on Coupled Hydrologic/Tectonic/Hydrothermal Systems at Yucca Mountain, Board on Radioactive Waste Management, Commission on Geosciences, Environment, and Resources, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1992
ISBN	9786610196340 9781280196348 1280196343 9780309544153 0309544157 9780585085326 0585085323
Edizione	[1st ed.]
Descrizione fisica	1 online resource (ix, 231 pages) : illustrations, maps
Disciplina	551.49/09793/34
Soggetti	Groundwater - Nevada - Yucca Mountain Radioactive waste disposal - Nevada - Yucca Mountain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Ground Water at Yucca Mountain How High Can It Rise? -- Copyright -- Contents -- Executive Summary -- INTRODUCTION -- HAS IT HAPPENED? -- Soils -- Springs -- Textural/Morphologic Evidence -- Breccias -- Isotopes -- CONCLUSION -- CAN IT HAPPEN? -- Increased Rainfall -- Volcanic Intrusion -- Earthquakes -- RECOMMENDATIONS -- Steep Hydraulic Gradient -- Paleozoic Carbonate Aquifer -- Scientific Integration/Coordination -- 1-Introduction -- REFERENCES -- 2-Water Levels in the Vicinity of the Proposed Repository in the Last 100,000 Years -- GEOLOGIC SETTING OF YUCCA MOUNTAIN AND ENVIRONS -- Paleozoic -- Mesozoic -- Cenozoic -- Extension -- Volcanic Activity -- Active Tectonics -- EPISODIC GROUND-WATER DISCHARGE THESIS -- SOIL DEVELOPMENT AND GEOMORPHOLOGICAL

### Sommario/riassunto

The site of a proposed repository for high-level radioactive waste from the nation's nuclear power plants is not at risk of ground water infiltration, concludes this important book. Yucca Mountain, located about 100 miles northwest of Las Vegas, has been proposed as the site for permanent underground disposal of high-level radioactive waste from the nation's civilian nuclear power plants. To resolve concerns raised by a Department of Energy (DOE) staff scientist concerning the potential for ground water to rise 1,000 feet to the level proposed for the repository, DOE requested this study to evaluate independently the past history and future potential of large upward excursions of the ground water beneath Yucca Mountain.
