CO₂ emissions, energy consumption, GDP, and foreign direct investment in ANICs Countries (Suyi Kim) -- Chapter 20. Consumer Heterogeneity and Trade in Shared Renewable Resource Trading (Takeshi Ogawa) -- Chapter 21. The Relationship between Oil Price and Korean Industrial Production and Inflation (In Huh).

Sommario/riassunto

An important feature of this book is its analysis of various contemporary issues in applied economics, distinguished by advanced theoretical research and empirical analysis focusing on Japan and Korea. The book consists of four parts, the first of which investigates economic growth and welfare, using tools of applied analysis. In Part II, it examines inequality, redistribution, and intergenerational transfers, mainly on an empirical basis. In turn, Part III explores public policy and political economics, while Part IV addresses resource and environmental economics on the basis of data from Japan and Korea. In addition to offering valuable insights, this collection of papers commemorates the 10th anniversary of academic exchange between the Japan Association for Applied Economics (JAAE) and the Korean Association for Applied Economics (KAAE).
