Titolo	A Chris[t]ian caveat to the old and new sabbatarians, or, A vindication of our gospel-festivals [[electronic resource]] : wherein is held forth, I. That the feast of Christs nativity is grounded upon the scriptures, was observed in the pure, ancient, apostolique times, and is approved by all reformed churches, II. That Christ was borne on the 25. day of December, and all objections to the contrary refuted, III. That the keeping holy the Lords Day was appointed by the Christian church, and that the morality, and divine institution of the Lords Day are meer fictions, IV. That the day of Christs nativity, the day of His passion, and the like, have equall authority, equall antiquity, equall right to be observed as the Lords Day, and that to work on those dayes is equally sinfull, V. That the observation of the Sabbath Day is abolished in Christ, and that to call the Lords Day the Sabbath is senseless, Jewish, unchristian, unwarrantable ... // by Edvvard Fisher .

Sommario/riassunto

At the beginning of the 20th century, our knowledge about glaucoma was truly rudimentary. Since then, it has grown to become a field of its own and, in the past decade, our concepts about its pathogenesis and potential avenues of future therapy have taken a quantum leap forward. It was not until the 1990's that the extent of non-pressure dependent risk factors for glaucoma became widely appreciated. Investigations into the role of ischemia and alternatives to pressure-lowering therapy, such as neuroprotective agents, have become the most recent area of focus.
