Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This report formally transmits the attached briefing in response to P.L. 110-329, the Consolidated Security, Disaster Assistance and Continuing Appropriations Act, that required GAO for the fourth year to review the methodology the Department of Homeland Security (DHS) and the Federal Emergency Management Agency (FEMA) use to allocate Homeland Security Grant Program (HSGP) grants, including the risk assessment methodology they use to determine which urban areas are eligible to apply for grants. HSGP includes the State Homeland Security Program (SHSP) and Urban Areas Security Initiative (UASI) grants. Our objective was to identify any changes in the methodology for risk assessment and grant allocation for 2009 and to assess the reasonableness of the methodology.
