

1. Record Nr.	UNISA996387333703316
Autore	Collinges John <1623-1690.>
Titolo	Strength in weakness [[electronic resource]] : preached at the funeral of Mrs. Martha Brooks, late wife to Mr. Tho. Brooks minister of the gospel in London, who departed this life June 20, 1676 : to which are added some experiences of the grace and dealings of God, observed and gathered by a near relation of the said Mrs. Brooks // by J.C. .
Pubbl/distr/stampa	London, : Printed for John Hancock ..., 1676
Descrizione fisica	[4], 39, [1] p
Soggetti	Funeral sermons
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Advertisement: p. [1] at end. Error in paging: p. 35 misnumbered 33. Reproduction of original in the Union Theological Seminary Library.
Sommario/riassunto	eebo-0160

2. Record Nr.	UNINA9911040913903321
Titolo	Advances in Implantation Otolaryngology // edited by Prawin Kumar, Niraj Kumar Singh, Mohnish Grover, Sunil Narayan Dutt
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2025
ISBN	981-9686-71-7
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (XXVI, 571 p. 196 illus., 131 illus. in color.)
Collana	Medicine Series
Disciplina	617.51
Soggetti	Otolaryngology Speech therapy Nervous system - Surgery Medicine Otorhinolaryngology Speech and Language Therapy Neurosurgery Clinical Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Anatomy and Physiology of Peripheral Auditory System -- 2. Functional Organisation of the Afferent Auditory Pathway -- 3. Anatomy and Physiology of the Vestibular System -- 4. Radiology from the Perspective of Implantable Hearing Devices: Normal Anatomy -- 5. Radiology from the Perspective of Implantable Hearing Devices: Abnormal Auditory System -- 6. Bone Conduction Implants: Audiological Perspectives -- 7. Bone Conduction Implants – Surgical Perspective -- 8. Middle Ear Implant: Audiological Perspectives -- 9. Middle Ear Implant: Surgical Perspectives -- 10. Cochlear Implant: History and Basic Concepts -- 11. Cochlear Implant: Audiological Perspective -- 12. Surgical Perspective of Cochlear Implants: Preoperative Preparation -- 13. Cochlear Implants: Surgical Technique -- 14. Cochlear Implant: Surgical Risks and Complications -- 15. Cochlear Implant: Signal Coding Strategies -- 16. Cochlear Implants: Pre-Processing Strategies -- 17. Cochlear Implants: Psychophysical Measures from Activation to Long-Term Management -- 18. Cochlear

Implants: Objective Measures in Mapping -- 19. Cochlear Implants: (Re) Habilitation -- 20. Assessment of Outcomes in Paediatric Cochlear Implant Users -- 21. Vestibular Function in Adult and Paediatric Cochlear Implant Recipients -- 22. Cortical Neuroplasticity in Deafness: Evidence from Children fitted with Implantable Auditory Prostheses -- 23. Auditory Brainstem Implants: Audiological Perspective -- 24. Auditory Brainstem Implant: Surgical Perspectives -- 25. Auditory Midbrain Implants -- 26. Vestibular Implant: The Present Status and Future Prospects.

Sommario/riassunto

The book *Advances in Implantation Otolaryngology* is a source of updated information on candidacy, surgery, and habilitation related to implantable hearing devices, all in one place for the professionals. The chapters in the book contain an amalgamation of sound theoretical background and rich clinical experiences of the authors. There are several books on implantable devices in the market, with the majority focusing on cochlear implants, with most of them missing details on other implantable devices, such as bone conduction implants, middle ear implants, auditory brainstem implants, mid-brain implants, and vestibular implants. While these implantable devices are taking rapid strides, often as an alternative to cochlear implantation, the information on them is largely scattered across journal articles and not easily accessible. This book provides details on vestibular implants, a topic either ignored or only briefly discussed in the existing books, with missing recent updates. This book also provides in-depth information on neuroplasticity and has an exclusive chapter on speech language assessment and therapy of cochlear implantees. A dedicated chapter in the book highlights the pre- and post-implantation vestibular issues in children and adults, an emerging area of concern and focus. The book also has an exclusive chapter on mid-brain implants. This book covers all kinds of hearing and vestibular implants from the perspectives of otologists (ENT specialists), audiologists, and habilitationists. In addition, this book is a precious commodity for undergraduate and postgraduate students and professional clinicians of otorhinolaryngology and audiology.
