

1. Record Nr.	UNISA996387680903316
Autore	Boyle Robert <1627-1691.>
Titolo	Tracts [[electronic resource]] : consisting of observations about the saltness of the sea: an account of a statical hygroscope and its uses: together with an appendix about the force of the air's moisture: a fragment about the natural and preternatural state of bodies. // By the Honourable Robert Boyle. ; To all which is premis'd a sceptical dialogue about the positive or privative nature of cold: with some experiments of Mr. Boyle's referr'd to in that discourse. By a member of the Royal Society
Pubbl/distr/stampa	London, : Sold by S. Smith at the Prince's Arms in St. Paul's Church-yard., 1690
Edizione	[The Second Edition.]
Descrizione fisica	[190] p. in various pagings
Soggetti	Seawater Cold Humidity Physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Imperfect: tightly bound, with loss of text. Reproduction of original in: Eton College. Library.
Nota di contenuto	Of the positive or privative nature of cold, a sceptical dialogue ... -- Two problems about cold, grounded on new experiments, and proposed in a letter to a friend: an attempt to manifest and measure the great expansive force of freezing water; a new experiment about the production of cold by the conflict of bodies appearing to make an ebullition -- Observations and experiments about the saltness of the sea -- The fourth section belonging to the tract formerly published under the title, Relations about the bottom of the sea -- A paradox of the natural and preternatural state of bodies, especially of the air -- A statical hygroscope proposed to be farther tryed, in a letter to H. Oldenburgh Esq. ... -- A new experiment and other instances of the efficacy of the air's moisture.
