Sommario/riassunto

The growth in part-time employment has been one of the most striking features in industrialized economies over the past forty years. Part-Time Prospects presents for the first time a systematically comparative analysis of the common and divergent patterns in the use of part-time work in Europe, America and the Pacific Rim. It brings together sociologists and economists in this wide-ranging and comprehensive survey. It tackles such areas as gender issues, ethnic questions and the differences between certain national economies including low pay, pensions and labour standards.

Sommario/riassunto

This open access book constitutes papers from the 5 research workshops, the poster presentations, as well as two panel discussions which were presented at XP 2021, the 22nd International Conference on Agile Software Development, which was held online during June 14-18, 2021. XP is the premier agile software development conference combining research and practice. It is a unique forum where agile researchers, practitioners, thought leaders, coaches, and trainers get together to present and discuss their most recent innovations, research results, experiences, concerns, challenges, and trends. XP conferences provide an informal environment to learn and trigger discussions and welcome both people new to agile and seasoned agile practitioners. The 18 papers included in this volume were carefully reviewed and selected from overall 37 submissions. They stem from the following workshops: 3rd International Workshop on Agile Transformation 9th
