Nota di contenuto

The Biology of Extracellular Molecular Chaperones; Contents; Chair's introduction; 1962-2007: a cell stress odyssey; DISCUSSION; The chaperone function: meanings and myths; DISCUSSION; Systems biology of molecular chaperone networks; DISCUSSION; Unusual cellular disposition of the mitochondrial molecular chaperones Hsp60, Hsp70 and Hsp10; DISCUSSION; Cell surface molecular chaperones as endogenous modulators of the innate immune response; DISCUSSION; Cell stress proteins in extracellular fluids: friend or foe?; DISCUSSION; HSP60 speaks to the immune system in many voices; DISCUSSION

	Cell stress proteins: novel immunotherapeuticsDISCUSSION; General discussion; Cell stress proteins as modulators of bacteria-host interactions; DISCUSSION; Chaperonin 60 and macrophage activation; DISCUSSION; Hsp70: a chaperokine; DISCUSSION; Extracellular functions of thioredoxin; DISCUSSION; HSP27: an anti-inflammatory and immunomodulatory stress protein acting to dampen immune function; DISCUSSION; BiP, an anti-inflammatory ER protein, is a potential new therapy for the treatment of rheumatoid arthritis; DISCUSSION; Final discussion; Contributor Index; Subject Index
Sommario/riassunto	The heat shock, or cell stress, response was first identified in the polytene chromosomes of Drosophila. This was later related to the appearance of novel proteins within stressed cells, and the key signal stimulating this appearance was identified as the presence of unfolded proteins within the cell. It is now known that this is a key mechanism enabling cells to survive a multitude of physical, chemical and biological stresses. Since the promulgation of the 'molecular chaperone' concept as a general cellular function to control the process of correct protein folding, a large number o

Sommario/riassunto	Both a passionate denunciation of masculinist readings of the Decameron and a meticulous critique of previous feminist analyses, Marilyn Migiel's A Rhetoric of the Decameron offers a sophisticated re-examination of the representations of women, men, gender identity, sexuality, love, hate, morality, and truth in Boccaccio's masterpiece. The Decameron stages an ongoing, dynamic, and spirited debate about issues as urgent now as in the fourteenth century ? a debate that can only be understood if the Decameron's rhetorical objectives and

strategies are completely reconceived. Addressing herself equally to those who argue for a proto-feminist Boccaccio ? a quasi-liberal champion of women's autonomy ? and to those who argue for a positivistically secure historical Boccaccio who could not possibly anticipate the concerns of the twenty-first century, Migiel challenges readers to pay attention to Boccaccio's language, to his pronouns, his passives, his echolalia, his patterns of repetition, and his figurative language. She argues that human experience, particularly in the sexual realm, is articulated differently by the Decameron's male and female narrators, and refutes the notion that the Decameron offers an undifferentiated celebration of Eros. Ultimately, Migiel contends, the stories of the Decameron suggest that as women become more empowered, the limitations on them, including the threat of violence, become more insistent.
