

1. Record Nr.	UNISA996390831303316
Autore	Anderson Robert <fl. 1668-1696.>
Titolo	Stereometrical propositions variously applicable, but particularly intended for gageing [[electronic resource] /] / by Robert Anderson
Pubbl/distr/stampa	London, : Printed by William Godbid for Joshuah Conniers ..., 1668
Descrizione fisica	[12], 108 p. : ill
Soggetti	Gaging
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Errata: p. 108. Reproduction of original in Cambridge University Library.
Sommario/riassunto	eebo-0021

2. Record Nr.	UNINA9910412135803321
Autore	Papadopoulos George Angelos
Titolo	Adjunct Publication of the 27th Conference on User Modeling, Adaptation and Personalization / / George Angelos Papadopoulos [and four others]
Pubbl/distr/stampa	New York : , : Association for Computing Machinery, , 2019
Descrizione fisica	1 online resource (436 pages)
Disciplina	004.019
Soggetti	Human-computer interaction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Welcome to the 27th ACM International Conference on User Modeling, Adaptation and Personalization - ACM UMAP 2019. This is the premier international conference for researchers and practitioners working on systems that adapt to individual users, to groups of users, and that collect, represent, and model user information. ACM UMAP is the successor to the biennial User Modeling (UM) and Adaptive Hypermedia and Adaptive Web-based Systems (AH) conferences that were merged in 2009. It is sponsored by ACM SIGCHI and SIGWEB, and organized with User Modeling Inc. as the Steering Committee The conference has a long tradition, so a number of submission types, presentation formats and procedures are established and have been shown to be successful. In this year's conference we built on these traditions and also explored new strands. The main components of this conference include eight main tracks, seven workshops, two tutorials, three keynotes, the doctoral consortium, the track on late-breaking results & demos, as well as the theory, opinion and reflection track. This year's motto was "Making Personalization Transparent: Giving control back to the User".
