Sommario/riassunto	This book is one of the first to include an extensive discussion of integrated public transport planning. In times of growing urban populations and increasing environmental awareness, the importance of optimizing public transport systems is ever-developing. Three different aspects are presented: line planning, timetabling, and vehicle scheduling. Classically, challenges concerning these three aspects of planning are solved sequentially. Due to their high interdependence,

the author presents a clear and detailed analysis of innovative, integrated models with accompanied numerical experiments performed to assess, and often support, the benefits of integration. The book will appeal to a wide readership ranging from graduate students to researchers.

Titolo	King Richard the Third revived [[electronic resource]] : Containing a memorable petition and declaration contrived by himself and his instruments, whiles Protector, in the name of the three estates of England, to importune and perswade him to accept of the kingship, and crown of England, by their joynt election, (as if he were unwilling to undertake, or accept, though he most ambitiously aspired after them, by the bloody murders of K. Henry 6. Edward 5. and sundry others) before his coronation; presented afterwards to, and confirmed by the three estates and himself, in his first Parliament, to give him a colourable title both by inheritance, and their election to the crown. Transcribed out of the Parliament roll of 1.R.3. (printed in Speeds History of Great Britain: where his other additionall policies to engage the City of London, lawyers, divines and people, to elect, and make him their king, are at large recorded.)
