Titolo	The work of the age: or, the sealed prophecies of Daniel opened and applied [[electronic resource]] : VVherein is plainly proved that all the governments in the world, except the government of Christ, are but images, or parts of Nebuchadnezzars image, and shall be suddenly broken in pieces by the little stone cut out of the mountain without hand: together with the means how Christ will effect all this. Shewing also that image-government, and image-worship have always been companions. Explaining likewise Daniels mystical numbers, and discovering some misprisions about the little horn, both in the translation and application of the same. Amending sundry places in our common translation, and clearing some chronological points from the common errors. // By William Aspinwall
