Sommario/riassunto   Responding to the current political climate of increased Islamist
                            militancy, the growing influence of the Christian Right on US foreign
                            policy and George Bush's war on terror, Media, Religion and Conflict
                            offers a series of case studies reflecting on how the media covers
                            religion as conflict within and between states. It challenges readers to
                            critically examine how media reportage and commentary influences
                            perceptions and responses to religion and security.
