Autore	Norden John <1548-1625?>
Titolo	The pensie mans practise . The second part [[electronic resource] =] : Or the pensie mans complaint and comfort. : [A] treatise most necessarie [f]or such as are any way afflicted. [Wh]erein they may reape most sweete consolation and comfort, as wel by sweete and familiar most godly directions, as also by comfortable praiers in whatsoeuer calamities. // Written by I.N.
Pubbl/distr/stampa	London, : Imprinted by I.W. for Iohn Oxenbridge dwelling in Paules Churchyard at the signe of the parrat., 1600
Descrizione fisica	[14], 248, [2] p. : coat of arms
Soggetti	Prayers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	I.N. = John Norden--Cf. STC (2nd ed.). Headpieces, initials; coat of arms verso of t.p. Signatures: A-L ¹ ² [pi] ¹ . Imperfect: tightly bound, and with print bleeding and show-through, resulting in loss of text; p. 91-98 lacking. Reproduction of original in: Bodleian Library.
Sommario/riassunto	eebo-0014

2. Record Nr.	UNINA9910725030303321
Autore	Socha Philipp
Titolo	Definitionen und Anerkennung substaatlicher Gruppen im Volkerrecht : Eine Untersuchung der rechtlichen Anwendung volkerrechtlicher Konstruktionen substaatlicher kollektiver Identitäten und aktueller Entwicklungen im Intergovernmental Committee der WIPO // Philipp Socha
Pubbl/distr/stampa	[Place of publication not identified] : , : Universitätsverlag Gottingen, , 2017 ©2017
Descrizione fisica	1 online resource (293 pages)
Collana	Gottinger Studien zu Cultural Property ; ; 12
Disciplina	305
Soggetti	Group identity
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Minderheiten, Indigene Volker und lokale Gemeinschaften haben in der Volkerrechtsordnung einen eigenen Status, da ihre Position in der Politik der Mehrheitsgesellschaft eines besonderen Schutzes bedarf und ihnen als Gruppe bestimmte Rechte zustehen. Ungeklärt ist dabei jedoch: Wie lassen sich diese kulturell distinkten substaatlichen Gruppen rechtlich bestimmen? Wem stehen die volkerrechtlichen Garantien des Minderheitenschutzes, das Recht auf Selbstbestimmung oder die Rechte an traditionellem Wissen zu? Erfolglos drehen sich die politisch gepragten Debatten in Wissenschaft und Praxis um Definitionsansätze und Kriterien kultureller Unterschiedlichkeit. Die vorliegende Arbeit zeigt, dass es die Anerkennung als 'Minderheit', 'Indigenes Volk' oder 'lokale Gemeinschaft' ist, die den konstitutiven Akt für den Status einer Gruppe bildet. Im Gegensatz zu den politischen Definitionsdebatten ermöglicht es die hier dargestellte Perspektive der Anerkennung, die statusrelevanten Prozesse und Institutionen in den Blick zu nehmen. Die Anerkennung substaatlicher Gruppen ist in Anlehnung an die Staatenanerkennung volkerrechtlich zu verorten und lässt sich interdisziplinär verankern. Die Perspektive

der Anerkennung lost die Diskussion um allgemeine kriteriale Definitionen ab und ermöglicht die Machtungleichgewichte und Interessenkonflikte zu erkennen, die der Statusfrage von kulturell distinkten substaatlichen Gruppen inhärent sind.

3. Record Nr.	UNINA9910963983803321
Titolo	Beyond tropical deforestation : from tropical deforestation to forest cover dynamics and forest development / / editor, Didier Babin
Pubbl/distr/stampa	Paris : , : United Nations Educational, Scientific and Cultural Organization : , : Centre de cooperation internationale en recherche agronomique pour le developpement, , 2004 ©2004
ISBN	9782759211104 275921110X 9782759207893 2759207897
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xxxvii, 488 pages) : illustrations (some color), maps (some color)
Altri autori (Persone)	BabinDidier
Disciplina	630
Soggetti	Deforestation - Tropics Forest dynamics - Tropics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Contents -- List of tables -- List of figures -- List of plates -- List of boxes -- List of contributors -- List of acronyms -- Introduction Didier Babin -- Part 1: Measuring and Understanding Deforestation and Forest Dynamics -- 1. The changing objectives of FAO forest resource evaluation Martin-Eric Loffeier and Julie Brayer -- 2. A spatial approach to deforestation phenomena : what remote sensing can contribute Jacques Imbernon -- 3. The contribution of 13C isotopic tracing of soil organic matter to the reconstitution of forest-savannah successions in the coastal zone of Gabon Robert Nasi and Dominique Schwartz -- 4. Deforestation in Amazonia : the actual situation is

difficult to pinpoint Luciana Machado and Richard Pasquis -- 5. The changes in Indonesian forests : available tools and indicators Marie-Gabrielle Piketty and Yves Laumonier -- 6. Deforestation in Côte d'Ivoire : the exploitation of forest resources François Verdeaux and Aliène Alpha -- 7. Deforestation and its impact on biological diversity : a question of scale Richard Pasquis and Meriem Bouamrane -- 8. Deforestation and fires : the example of Madagascar Alain Bertrand and Rivo Ratsimbarison -- 9. Environmental impact of deforestation : the retreat of the mangrove versus mangle dynamics Marie-Christine Cormier-Salem -- 10. Tropical forest dynamics and climate change Bruno Locatelli and Alain Karsenty -- Part 2: Forest Dynamics as a Complex Society Process -- 11. Can deforestation help rebuild forests? The Indonesian agroforests Geneviève Michon and Meriem Bouamrane -- 12. Does population growth affect wooded-cover dynamics? Bruno Locatelli, Stanislas Boissau and Jacques Weber -- 13. The spread of the Merina people in Madagascar and natural forest and eucalyptus stand dynamics Alain Bertrand. 14. Forest dynamics : the case of Burundi : images, views, farmer innovations and forestry policies Philippe Guizol and Cléto Ndikumagenge -- 15. Agricultural occupation patterns in an immigration zone in south-western Burkina Faso Xavier Augusseau and Souleymane Pare -- 16. Agricultural pioneer fronts, the crest of a far-reaching wave : the social and spatial dimension of lowland colonization in Nicaragua Christophe Mالدیدیر -- 17. Grazing impact on the savannah in Burkina Faso : a three-scale investigation of ligneous plant dynamics in animal production zones Sandrine Petit, Marie Bussière and Julie Laurent -- 18. Analysis of the anthropic causes of changes in riverbank formations in an agropastoral area of Burkina Faso (Sidéradougou) Stéphane de la Rocque, Mohamed Diallo and Jean César -- 19. The effects of cattle ranching on land use of family holdings in the eastern-Amazon region of Brazil Jean-François Tourrand, Jonas Bastos da Veiga, René Pocard-Chapuis, Nathalie Hostiou, Laura Angélica Ferreira, Rui Manuel Rosário Ludovino and Marie-Gabrielle Piketty -- 20. From shifting agriculture to sustainable complex rubber agroforestry Systems (jungle rubber) in Indonesia : a history of innovation processes Eric Penot -- 21. Collective choices and individual decisions : the sustainability of Indonesian agroforests Meriem Bouamrane and Geneviève Michon -- 22. The tree-crop-based pioneer fronts and lack of replanting : a qualitative model François Ruf -- 23. The Sulawesi case : deforestation, pre-cocoa and cocoa migrations François Ruf and Yoddang -- 24. The rubber showcase in Sumatra Eric Penot -- Part 3: Research, Management and Development Perspectives -- 25. Post-forest areas : how can they contribute to a new forest conservation strategy? Richard Pasquis and Luciana Machado. 26. Amazonian protected natural area schemes : from conservation to sustainable development of forest ecosystems Isabelle Moulis and Richard Pasquis -- 27. Deforestation, agricultural concession policies and potential conflicts in Sanggau district, West Kalimantan province, Indonesia Eric Penot and Cathy Geissler -- 28. Biosphere reserves as a tool in regional planning and resource management in forested landscapes Malcolm Hadley -- 29. Ecological scales and use rights : the use of multi-agent systems François Bousquet, Christophe Le Page, Martine Antona and Philippe Guizol -- 30. A brief presentation of land-use models used to analyse forest dynamics Arlène Alpha -- 31. Looking for sustainable tropical forest management criteria and indicators : the limitations of a normative environmental management approach Guillaume Lescuyer, Alain Karsenty and Martine Antona --

32. Forest deconstruction and reconstruction : lines of research for a hybrid issue François Verdeaux -- 33. Trees outside the forest : a new perspective on the management of forest resources in the tropics Michelle Pain-Orcet and Ronald Bellefontaine -- 34. Forest cover and agricultural technology David Kaimowitz and Arild Angelsen -- 35. Rethinking forest management based on forest dynamics Alain Bertrand, Didier Babin and Jean-Guy Bertault -- 36. The historical origins of deforestation and forestry policy in French-speaking Africa : from superstition to reality? Alain Bertrand, Jesse Ribot and Pierre Montagne -- 37. Conclusions Didier Babin, Jacques Weber and Jeffrey Sayer -- Index -- Tables -- 1.1. Transition matrix (partial) extended to the whole of the project zone for the period 1980-90 -- 1.2. Estimated forest cover and deforestation rates for the period 1980-90, and for the strict definition of the term forest, with corresponding standard deviations.

2.1. Some of the main operational earth observation satellites -- 4.1. Stratification of Brazilian Amazonia -- 4.2. Scales and use of remote sensing systems to monitor tropical forest deforestation -- 9.1. Main physical and biological roles of mangrove swamps -- 14.1. Sacred trees. Some cultivated species and their uses -- 14.2. The public forest situation in Burundi in 1967, and before and after the 1993 crisis -- 14.3. Population growth in Burundi -- 17.1. Land occupation as a percentage of the area surrounding the village -- 17.2. Brushwood species that cause brush invasion in the Sudanian zone, according to various authors -- 19.1. Land use in a small farm within the county of Uruará, Transamazon region, in 1994 and 1997. Mean data on a sample of 104 farms -- 19.2. Land use in the family holding in the Bragantina region between 1994 and 1997. Mean data for a sampling of ninety-five holdings -- 20. 1. Historical relations between the Indonesian government and smallholder commodity producers -- 20.2. Land planted to rubber in projects between 1970 and 2000 -- 20.3. Agroforestry practices on clonal project plots in West Kalimantan -- 20.4. Replanting by project farmers in the West Kalimantan province -- 21.1. Resource uses and their status -- 23. 1. Mode of access to land and sources of capital and evolution per year in Wotu -- 25.1. Cleared and abandoned areas in legal Amazonia, 1996 -- 25.2. Share of main sectors in state GDP -- 25.3. Agricultural activity and productivity -- 27.1. The TGHK forestry classification and its main characteristics -- 27.2. Types of forest, concessions and actors -- 27.3. Areas and proportions of the different types of land occupation in 1995, after GIS processing -- 31.1. The différent C& -- I proposals -- Figures -- 2.1. Regions of the electromagnetic spectrum used by remote sensing. 2.2. Errors caused by spatial resolution -- 2.3. Means and standard deviations of the backscattered ERS signal for different types of land cover in Rondonia, Brazil. Water and pasture are clearly separated, but forest, crops and fallow are easily confused -- 2.4. The TREES project proposed typology of deforestation patterns -- 7.1. The swathe of deforestation -- 7.2. Profile of the dense tropical forest in the Manaus region -- 10.1. Carbon density in different types of ecosystems and areas covered per type -- 10.2. Carbon exchanges between the atmosphere, the sea and the continental biosphere for the period 1989-98 -- 10.3. A simplified model of carbon reserves and flows within a planted forest -- 12.1. Map of Madagascar showing the Mananara region and the three study villages -- 12.2. Landscape history study method -- 12.3. Intuitive interpretation of three remarkable landscapes -- 12.4. The U-curve -- 12.5. Population density and wooded cover -- 12.6. Population density and wooded areas -- 3.1. Map of the successive boundaries of the Manjakandriana

natural forest -- 15.1. Location of the study zone -- 15.2. Agricultural areas in the study zone -- 16.1. Pioneer front mechanisms : 'domino migration' -- 20.1. Alternatives between food crops, cash crops and rubber Systems -- 20.2. Value of labour cost when NPV = 0 : equivalent to return to labour for each System -- 20.3. Net incremental benefit (NPV) of each system compared with jungle rubber -- 20.4. Production value (NPV) for each System -- 22. 1. A conceptual model of cocoa cycles -- 22.2. Arrival of migrants and cocoa price. Krémoué, San Pedro, 1978-2000 -- 22.3. Annual cocoa plantings (by autochthons and migrants) and cocoa price. Krémoué, 1978-2001 -- 23. 1. Number of new migrants per year and current cocoa price in Lapai, South-East Sulawesi, 1970-89. 23.2. Cocoa production in Sulawesi and New York price.

Sommario/riassunto

Le constat de l'irréversible destruction des forêts tropicales et de la biodiversité masquerait-il une grande diversité de situations? Fondé sur les travaux de chercheurs en sciences de la nature et en sciences sociales, ce livre tente de répondre à des questions fondamentales: qu'est-ce que la déforestation et comment la mesurer, quels changements induit-elle et comment les sociétés humaines les gèrent-elles? Il analyse les divers aspects de la déforestation, processus dont les effets ne sont pas toujours aussi négatifs que ce que l'on croit.
