

1. Record Nr.	UNISA996466202403316
Titolo	Computational Linguistics and Intelligent Text Processing [[electronic resource]] : 4th International Conference, CICLing 2003, Mexico City, Mexico, February 16-22, 2003. Proceedings / / edited by Alexander Gelbukh
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2003
ISBN	3-540-36456-0
Edizione	[1st ed. 2003.]
Descrizione fisica	1 online resource (XVI, 652 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 2588
Disciplina	005
Soggetti	Computational linguistics Information storage and retrieval Mathematical logic Artificial intelligence Natural language processing (Computer science) Computational Linguistics Information Storage and Retrieval Mathematical Logic and Formal Languages Artificial Intelligence Natural Language Processing (NLP)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Computational Linguistics -- Starting with Complex Primitives Pays Off -- Things Are Not Always Equal -- GIGs: Restricted Context-Sensitive Descriptive Power in Bounded Polynomial-Time -- Total Lexicalism and GASGrammars: A Direct Way to Semantics -- Pseudo Context-Sensitive Models for Parsing Isolating Languages: Classical Chinese — A Case Study -- Imperatives as Obligatory and Permitted Actions -- Formal Representation and Semantics of Modern Chinese Interrogative Sentences -- Analyzing V+Adj in Situation Semantics -- Diagnostics for Determining Compatibility in English Support-Verb-Nominalization Pairs -- A Maximum Entropy Approach for Spoken Chinese

Understanding -- A Study to Improve the Efficiency of a Discourse
Parsing System -- Conversion of Japanese Passive/Causative Sentences
into Active Sentences Using Machine Learning -- From Czech
Morphology through Partial Parsing to Disambiguation -- Fast Base NP
Chunking with Decision Trees - Experiments on Different POS Tag
Settings -- Guaranteed Pre-tagging for the Brill Tagger -- Performance
Analysis of a Part of Speech Tagging Task -- An Efficient Online Parser
for Contextual Grammars with at Most Context—Free Selectors --
Offline Compilation of Chains for Head-Driven Generation with
Constraint-Based Grammars -- Generation of Incremental Parsers --
Computing with Realizational Morphology -- Approach to Construction
of Automatic Morphological Analysis Systems for Inflective Languages
with Little Effort -- Per-node Optimization of Finite-State Mechanisms
for Natural Language Processing -- An Evaluation of a Lexicographer's
Workbench Incorporating Word Sense Disambiguation -- Using
Measures of Semantic Relatedness for Word Sense Disambiguation --
Automatic Sense Disambiguation of the Near-Synonyms in a Dictionary
Entry -- Word Sense Disambiguation for Untagged Corpus: Application
to Romanian Language -- Automatic Noun Sense Disambiguation --
Tool for Computer-Aided Spanish Word Sense Disambiguation --
Augmenting WordNet's Structure Using LDOCE -- Building Consistent
Dictionary Definitions -- Is Shallow Parsing Useful for Unsupervised
Learning of Semantic Clusters? -- Experiments on Extracting Semantic
Relations from Syntactic Relations -- A Method of Automatic Detection
of Lexical Relationships Using a Raw Corpus -- Sentence Co-
occurrences as Small-World Graphs: A Solution to Automatic Lexical
Disambiguation -- Dimensional Analysis to Clarify Relations among the
Top-Level Concepts of an Upper Ontology: Process, Event, Substance,
Object -- Classifying Functional Relations in Factotum via WordNet
Hypernym Associations -- Processing Natural Language without
Natural Language Processing -- The Design, Implementation, and Use
of the Ngram Statistics Package -- An Estimate Method of the Minimum
Entropy of Natural Languages -- A Corpus Balancing Method for
Language Model Construction -- Building a Chinese Shallow Parsed
TreeBank for Collocation Extraction -- Corpus Construction within
Linguistic Module of City Information Dialogue System -- Diachronic
Stemmed Corpus and Dictionary of Galician Language -- Can We
Correctly Estimate the Total Number of Pages in Google for a Specific
Language? -- The Word Is Mightier than the Count: Accumulating
Translation Resources from Parsed Parallel Corpora -- Identifying
Complex Sound Correspondences in Bilingual Wordlists -- Generating
Texts with Style -- Multilingual Syntax Editing in GF -- QGen—
Generation Module for the Register Restricted InBASE System --
Towards Designing Natural Language Interfaces -- A Discourse System
for Conversational Characters -- A Portable Natural Language Interface
for Diverse Databases Using Ontologies -- Time-Domain Structural
Analysis of Speech -- Experiments with Linguistic Categories for
Language Model Optimization -- Chinese Utterance Segmentation in
Spoken Language Translation -- Intelligent Text Processing -- Using
Natural Language Processing for Semantic Indexing of Scene-of-Crime
Photographs -- Natural Language in Information Retrieval -- Natural
Language System for Terminological Information Retrieval -- Query
Expansion Based on Thesaurus Relations: Evaluation over Internet --
Suggesting Named Entities for Information Access -- Probabilistic Word
Vector and Similarity Based on Dictionaries -- Web Document Indexing
and Retrieval -- Event Sentence Extraction in Korean Newspapers --
Searching for Significant Word Associations in Text Documents Using
Genetic Algorithms -- Cascaded Feature Selection in SVMs Text

Categorization -- A Study on Feature Weighting in Chinese Text
Categorization -- Experimental Study on Representing Units in Chinese
Text Categorization -- Partitional Clustering Experiments with News
Documents -- Fast Clustering Algorithm for Information Organization
-- Automatic Text Summarization of Scientific Articles Based on
Classification of Extract's Population -- Positive Grammar Checking: A
Finite State Approach.

Sommario/riassunto

CICLing 2003 (www.CICLing.org) was the 4th annual Conference on Intelligent Text Processing and Computational Linguistics. It was intended to provide a balanced view of the cutting-edge developments in both the theoretical foundations of computational linguistics and the practice of natural language text processing with its numerous applications. A feature of CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. The conference is a forum for dialogue between the specialists working in these two areas. This year we were honored by the presence of our keynote speakers Eric Brill (Microsoft Research, USA), Aravind Joshi (U. Pennsylvania, USA), Adam Kilgarriff (Brighton U., UK), and Ted Pedersen (U. Minnesota, USA), who delivered excellent extended lectures and organized vivid discussions. Of 92 submissions received, after careful reviewing 67 were selected for presentation; 43 as full papers and 24 as short papers, by 150 authors from 23 countries: Spain (23 authors), China (20), USA (16), Mexico (13), Japan (12), UK (11), Czech Republic (8), Korea and Sweden (7 each), Canada and Ireland (5 each), Hungary (4), Brazil (3), Belgium, Germany, Italy, Romania, Russia and Tunisia (2 each), Cuba, Denmark, Finland and France (1 each).
