Nota di contenuto

Occipitocervical junction -- Midcervical spine -- Cervicothoracic junction -- Thoracic and thoracolumbar spine -- Lumbar and Lumbosacral spine -- Minimally invasive spine procedures -- Peripheral nerve

Sommario/riassunto

Complete state-of-the-art coverage of surgical techniques for the spine and peripheral nerves, engaging the full range of approaches--anterior, anterolateral, posterior, and spanning posteriolateral--for these operations. Each section opens with an in-dept discussion of pathology, etiology, and differential diagnosis to help master the underlying scientific principles of diseases and conditions of the spine and peripheral nerves. The authors then present technique-oriented chapters containing step-by-step descriptions of surgical procedures
