

1. Record Nr.	UNISA996396609303316
Autore	Grantham Thomas <1634-1692.>
Titolo	A dialogue between the Baptist and the Presbyterian [[electronic resource]] : Wherein the Presbyterians are punished by their own pens, for their cruel and soul-devouring doctrines, making God the ordainer of all the sins of men and devils: and reprobating the greatest part of mankind, without any help of salvation. Whereunto is annexed, a treatise of election, intituled, The order of causes: formerly published by an eminent servant of Christ, and now republished with some explication concerning free-will. By Thomas Grantham, messenger of the baptized churches in Lincolnshire
Pubbl/distr/stampa	London, : [s.n.], printed in the year, 1691
Descrizione fisica	28 p

Livello bibliografico	Monografia
Sommario/riassunto	D'une guerre à l'autre se dessine une période d'âge d'or pour les activités caritatives, caractérisée par l'émergence de nombreuses institutions humanitaires, telles que le Joint, l'American Friends Service Committee (AFSC), OXFAM, CARE, mais aussi par l'influence décisive d'organisations telles que l'American Relief Administration (ARA), les différentes Croix-Rouge nationales, le Comité international de la Croix-Rouge ou la Commission for Relief in Belgium (CRB). Cet ouvrage propose un regard neuf sur l'histoire des organisations humanitaires. D'une guerre à l'autre, le livre propose une étude des actions d'entraide pour les populations souffrant de la faim à travers l'un des objets les plus emblématiques des actions de secours durant cette période, le colis alimentaire. En ouvrant le colis, en interrogeant son parcours depuis son lieu de fabrication et sa distribution aux bénéficiaires, nous pouvons reconstruire une histoire de l'humanitaire à travers une histoire sociale et culturelle des actions philanthropiques. Compagnies du secours, les organisations philanthropiques mobilisent flottes de bateaux, trains, camions, alors que leurs colis sont entassés dans des palettes facilement transportables. Objet de l'économie de

marché, le colis s'adapte aux attentes des donateurs, aux conditions logistiques et aux besoins des destinataires. Bref, le colis facilite la cristallisation d'une communauté de donateurs et d'un espace d'intervention humanitaire construit par l'engagement des organisations non gouvernementales, des organisations internationales et des États en guerre.

Descrizione fisica	1 online resource (192 p.)
Soggetti	Medical equipment and techniques
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Mobile technology has undergone rapid development in the last decade and immediately found fertile ground for use in digital healthcare applications. The advantages both for citizens and the health domain are many and interconnected. During the pandemic, mobile technology was also useful for minimizing social distancing, epidemiological monitoring through contact tracing, psychological support, and maintaining social relationships. There is a particular need for scholars to focus both on the innovations in this field during the pandemic and on the problems hampering the use of mobile technology to facilitate the correct and effective introduction of this technology into routine clinical programs in stable health care models. All professionals working in this sector were encouraged to contribute with their experiences. This reprint contains contributions from various experts and different fields. Aspects relating to the success and failures of employment, the medical experience, and acceptance are addressed.

Particular space was also given to the role of social media, the use of apps (also presenting critical issues), and innovative apps for contact tracing. The digital divide and the infodemic were also investigated along with their impacts on citizens during the pandemic, for example, in following government directives relating to prevention and vaccination. We dedicate the book to all those involved with different roles in digital health.
