	Sommario/riassunto	An award winning system developer explains how to create, test, and implement a profitable trading system Traders have long been drawn to the idea of translating their strategies and ideas into trading systems. While successful trading systems have been developed, in most cases, they work very well for a period of time in specific markets, but perform less well across all markets in all time frames. Nobody

understands this better than author Keith Fitschen-a thought-leader in trading system development-and now, with Trading Strategy Generation + Website, he shares his extensive

Sommario/riassunto	In <i>Winning at War</i> , Christian Potholm explains how seven variables—technology, sustained ruthlessness, discipline, receptivity to innovation, protection of military capital from civilians and rulers, will, and the belief that there will always be another war—have served as predictors of military success over time and across cultures. He provides case studies of their implementation, from ancient battles to today.
