Sommario/riassunto	This book explores the significance of the establishment of the World Trade Organisation (WTO), as well as some of the issues brought into sharper focus by the Seattle demonstrations of 1999. Located within the broader study of global governance, Multilateralism and the World Trade Organisation offers a critical examination of the legal framework of the WTO. The book uncovers a series of discriminatory practices embedded in the WTO's legal framework, which act to the disadvantage of smaller, developing and transitional states.

3. Record Nr.	UNINA9910780899203321

Nota di contenuto	A Rebuttal on Health -- Defining Disease: The Question of Sexual Orientation -- Malady -- Toward a Pragmatic Theory of Disease -- Defining Disease: Praxis Makes Perfect -- Disease: Definition and Objectivity -- Disease and Subjectivity -- The Concept of Disease in Alternative Medicine.
Sommario/riassunto	In <i>What is Disease?</i> , renowned philosophers and medical ethicists survey and elucidate the profoundly important concepts of disease and health. Christopher Boorse begins with an extensive reexamination of his seminal definition of disease as a value-free scientific concept. In responding to all those who criticized this view, which came to be called "naturalism" or "neutralism," Boorse clarifies and updates his landmark ideas on this crucial question. Other distinguished thinkers analyze, develop, and oftentimes defend competing, nonnaturalistic theories of disease, including discussions of the relevance of these concepts to the question of "diseased" sexual orientation and to alternative medicine. <i>What is Disease?</i> brings concerned readers up-to-date in the debate over the proper definition of "disease," a concept of central importance not only for bioethicists, but also for those

throughout clinical medicine, sociology, psychology, and law who deal with disease and its associated problems on an everyday basis.
