

1. Record Nr.	UNINA9910457424403321
Titolo	Continuities and changes in Maya archaeology [[electronic resource]] : perspectives at the millennium // edited by Charles W. Golden and Greg Borgstede
Pubbl/distr/stampa	New York, : Routledge, 2004
ISBN	1-280-28878-7 9786610288786 0-203-49422-9
Descrizione fisica	1 online resource (297 p.)
Altri autori (Persone)	GoldenCharles W. <1972-> BorgstedeGreg <1972->
Disciplina	972.81/016
Soggetti	Mayas - Antiquities Mayas - Material culture Archaeology - Mexico - History - 20th century Archaeology - Central America - History - 20th century Electronic books. Mexico Antiquities Central America Antiquities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Book Cover; Haf-title; Title; Copyright; Dedication; Contents; Notes on Contributors; 1 Continuities and Changes in Maya Archaeology: An Introduction; 2 Looking Backward and Looking Forward: How Maya Studies of Yesterday Shape Today; 3 Kingship and Polity: Conceptualizing the Maya Body Politic; 4 The Blind Spot: Where the Elite and Non-Elite Meet; 5 History in the Future: Historical Data and Investigations in Lowland Maya Studies; 6 Ancient Maya Landscapes; 7 Maya Epigraphy at the Millennium: Personal Notes; 8 Noxious or Nurturing Nature? Maya Civilization in Environmental Context 9 The Past and Future of Maya Ceramic Studies10 Lithic Analysis in the Maya Area; 11 Osteological Investigations of Ancient Maya Lives; 12 Maya Zooarchaeology: In Pursuit of Social Variability and Environmental

Heterogeneity; 13 What Did They Do and Where? Activity Areas and Residue Analyses in Maya Archaeology; 14 Professional Archaeology and the Modern Maya: A Historical Sketch; 15 We Have Never Been Post-modern: Maya Archaeology in the Ethnographic Present; 16 The Sacred Place in the Development of Archaeology in Guatemala: An Analysis
17 Continuities and Changes in Maya Archaeology: An OverviewIndex

Sommario/riassunto

Presents the current state of of Maya archaeology by focusing on the history of the field for the past hundred years, present day research, and forward looking prescription for the direction of the

Includes index.

Sommario/riassunto

Simplify machine learning model implementations with Spark About This Book Solve the day-to-day problems of data science with Spark This unique cookbook consists of exciting and intuitive numerical recipes Optimize your work by acquiring, cleaning, analyzing, predicting, and visualizing your data Who This Book Is For This book is for Scala developers with a fairly good exposure to and understanding of machine learning techniques, but lack practical implementations

with Spark. A solid knowledge of machine learning algorithms is assumed, as well as hands-on experience of implementing ML algorithms with Scala. However, you do not need to be acquainted with the Spark ML libraries and ecosystem. What You Will Learn Get to know how Scala and Spark go hand-in-hand for developers when developing ML systems with Spark Build a recommendation engine that scales with Spark Find out how to build unsupervised clustering systems to classify data in Spark Build machine learning systems with the Decision Tree and Ensemble models in Spark Deal with the curse of high-dimensionality in big data using Spark Implement Text analytics for Search Engines in Spark Streaming Machine Learning System implementation using Spark In Detail Machine learning aims to extract knowledge from data, relying on fundamental concepts in computer science, statistics, probability, and optimization. Learning about algorithms enables a wide range of applications, from everyday tasks such as product recommendations and spam filtering to cutting edge applications such as self-driving cars and personalized medicine. You will gain hands-on experience of applying these principles using Apache Spark, a resilient cluster computing system well suited for large-scale machine learning tasks. This book begins with a quick overview of setting up the necessary IDEs to facilitate the execution of code examples that will be covered in various chapters. It also highlights some key issues developers face while working with machine learning algorithms on the Spark platform. We progress by uncovering the various Spark APIs and the implementation of ML algorithms with developing classification systems, recommendation engines, text analytics, clustering, and learning systems. Toward the final chapters, we'll focus on building high-end applications and explain various unsupervised methodologies and challenges to tackle when implementing with big data ML systems. Style and approach This book is packed with intu...
