

1. Record Nr.	UNINA9910452339403321
Autore	Rosenberg Gary A
Titolo	Molecular physiology and metabolism of the nervous system [[electronic resource] /] / Gary A. Rosenberg
Pubbl/distr/stampa	New York, : Oxford University Press, c2012
ISBN	0-19-932283-X 1-280-59557-4 9786613625403 0-19-983822-4
Descrizione fisica	1 online resource (241 p.)
Collana	Contemporary neurology series, , 0069-9446 ; ; 82
Disciplina	612.8/042
Soggetti	Cerebrospinal fluid - Physiology Blood-brain barrier - Physiology Brain - Pathophysiology Cerebrospinal fluid - Metabolism Cerebral circulation - Physiology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Anatomy of fluid interfaces that protect the microenvironment -- Physiology of the cerebrospinal and interstitial fluids -- Neurovascular unit -- Glucose, amino acid and lipid metabolism -- Disorders of cerebrospinal circulation : idiopathic intracranial hypertension (IIH) and hydrocephalus -- Quantification of cerebral blood flow and blood brain barrier transport by NMR and PET -- Mechanisms of ischemic/hypoxic brain injury -- Vascular cognitive impairment and Alzheimer's disease -- Effects of altitude on the brain -- Brain edema -- Intracerebral hemorrhage -- Autoimmunity, hypoxia, and inflammation in demyelinating diseases.
Sommario/riassunto	The molecular basis for the physiology of the brain has advanced enormously in the past twenty years with an influx of new information gleaned through technological developments in neuroimaging and molecular discoveries. Molecular Physiology and Metabolism of the Nervous System, authored by Gary A. Rosenberg, an authority on the

physiology of brain fluids and metabolism, combines the classic physiology that dates back to the beginning of the nineteenth century with the advances in molecular sciences, providing a strong framework for understanding the diseases that are commonly treated by neuro

2. Record Nr.

Titolo

UNISA996396843303316

Whereas the sins of prophanie swearing and cursing are offenses forbidden by the word of God, and do highly provoke his wrath, not onely against the persons that are guilty thereof but also against the place where such crimes are permitted to pass unpunished ..

[[electronic resource] /] by the Lord Lieutenant and Council, Ormonde
