

1. Record Nr.	UNISA996418164203316
Titolo	5th International Symposium of Space Optical Instruments and Applications [[electronic resource]] : Beijing, China, September 5–7, 2018 // edited by H. Paul Urbach, Qifeng Yu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-27300-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XII, 416 p. 263 illus., 204 illus. in color.)
Collana	Springer Proceedings in Physics, , 0930-8989 ; ; 232
Disciplina	522.2
Soggetti	Lasers Photonics Observations, Astronomical Astronomy—Observations Remote sensing Aerospace engineering Astronautics Optics, Lasers, Photonics, Optical Devices Astronomy, Observations and Techniques Remote Sensing/Photogrammetry Aerospace Technology and Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Organization -- Papers 1-41 -- Index.
Sommario/riassunto	This book gathers selected and expanded contributions presented at the 5th Symposium on Space Optical Instruments and Applications, which was held in Beijing, China, on September 5–7, 2018. This conference series is organized by the Sino-Holland Space Optical Instruments Laboratory, a cooperative platform between China and the Netherlands. The symposium focused on key technological problems regarding optical instruments and their applications in a space context. It covered the latest developments, experiments and results on the theory, instrumentation and applications of space optics. The book is

split into five main sections: The first covers optical remote sensing system design, the second focuses on advanced optical system design, and the third addresses remote sensor calibration and measurement. Remote sensing data processing and information extraction are then presented, followed by a final section on remote sensing data applications.
