1. Record Nr.   UNISA996418218903316

   Titolo   Information Security and Cryptology [[electronic resource]] : 15th
                        International Conference, Inscrypt 2019, Nanjing, China, December 6–8,
                        2019, Revised Selected Papers / / edited by Zhe Liu, Moti Yung

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                        2020

   ISBN   3-030-42921-0

   Edizione   [1st ed. 2020.]

   Descrizione fisica   1 online resource (560 pages)

   Collana   Security and Cryptology ; ; 12020

   Disciplina   005.8

   Soggetti   Computer security
                        Data encryption (Computer science)
                        Application software
                        Computer communication systems
                        Computer networks - Security measures
                        Architecture, Computer
                        Systems and Data Security
                        Cryptology
                        Information Systems Applications (incl. Internet)
                        Computer Communication Networks
                        Mobile and Network Security
                        Computer System Implementation

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia Includes bibliographical references and index.

   Nota di contenuto   Invited Papers -- Post-Quantum Cryptography -- AI Security --
                        Systems Security -- Side Channel Attacks -- Identity-Based
                        Cryptography -- Signatures -- Cryptanalysis -- Authentication --
                        Mathematical Foundations.

   Sommario/riassunto   This book constitutes the post-conference proceedings of the 15th
                        International Conference on Information Security and Cryptology,
                        Inscrypt 2019, held in Nanjing, China, in December 2019. The 23 full
                        papers presented together with 8 short papers and 2 invited papers
                        were carefully reviewed and selected from 94 submissions. The papers

cover topics in the fields of post-quantum cryptology; AI security; systems security; side channel attacks; identity-based cryptography; signatures; cryptanalysis; authentication; and mathematical foundations.
