| Titolo                  | Advances in Mathematical Economics [[electronic resource] ] : Volume 23 // edited by Toru Maruyama   |
| Pubbl/distr/stampa      | Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020  |
| ISBN                    | 981-15-0713-9  |
| Edizione                | [1st ed. 2020.]  |
| Descrizione fisica      | 1 online resource (VII, 329 p. 23 illus.)  |
| Collana                 | Advances in Mathematical Economics, , 1866-2226 ; ; 23   |
| Disciplina              | 330.0151   |
| Soggetti                | Game theory<br>Probabilities<br>Game Theory, Economics, Social and Behav. Sciences<br>Probability Theory and Stochastic Processes  |
| Lingua di pubblicazione | Inglese  |
| Formato                 | Materiale a stampa   |
| Livello bibliografico   | Monografia   |
| Note generali           | Includes index.  |
| Nota di contenuto       | Twenty-three Years of Advances in Mathematical Economics -- Optimal Control over Infinite Time Horizon -- Sard-Smale Theorem.  |
| Sommario/riassunto      | The series is designed to bring together those mathematicians who are seriously interested in getting new challenging stimuli from economic theories with those economists who are seeking effective mathematical tools for their research. A lot of economic problems can be formulated as constrained optimizations and equilibration of their solutions. Various mathematical theories have been supplying economists with indispensable machineries for these problems arising in economic theory. Conversely, mathematicians have been stimulated by various mathematical difficulties raised by economic theories. |
